

# AGENDA

## PUBLIC HEALTH ADVISORY BOARD

### Ad hoc committee

## Guiding principles for public health and health care collaboration

March 6, 2017

11:00 am-12:30 pm

Conference line: (877) 848-7030

Access code: 2030826

Webinar link: <https://attendee.gotowebinar.com/register/8266406974935496706>

#### Meeting Objectives

- Review purpose for developing guiding principles for public health and health care collaboration
- Review draft guiding principles
- Make recommendations for a set of guiding principles

PHAB members: Tricia Tillman, Muriel DeLaVergne-Brown, Safina Koreishi, Rebecca Pawlak

---

11:00-11:05	<b>Welcome and introductions</b>	Cara Biddlecom, Oregon Health Authority
11:05-11:15	<b>Discuss purpose for developing guiding principles for public health and health care collaborations</b>	Cara Biddlecom, Oregon Health Authority
11:15-12:15	<b>Develop guiding principles</b> <ul style="list-style-type: none"><li>• Review and propose changes to draft principles</li><li>• Make recommendations for a set of guiding principles to be reviewed at 3/16 PHAB meeting</li><li>• Determine which PHAB member will present guiding principles at the 3/16 meeting</li></ul>	All
12:15-12:25	<b>Public comment</b>	
12:25 adjourn	<b>Adjourn</b>	

---

# Public Health Advisory Board Ad Hoc Committee

## **Draft for discussion:** Guiding principles for public health and health care collaboration

March 6, 2017

PHAB members: Tricia Tillman, Muriel DeLaVergne-Brown, Safina Koreishi, Rebecca Pawlak

### 1. Purpose

This set of guiding principles is a tool PHAB members can use when faced with opportunities to build collaborations between public health and the health care sector.

### 2. Background

The Statewide Public Health Modernization Plan includes a *Roadmap for Modernizing Oregon's Public Health System*. The following priority and strategies for improving population health through cross-sector collaborations is included in the roadmap. State and local public health authorities identified these as essential steps for achieving a modern public health system that protects and improves the health of every person in Oregon.

Priority 2: Align and coordinate public health and early learning, CCOs, hospitals, and other health partners and stakeholders for collective impact on health improvements.

- Strategy 8: Establish new and innovative collaborative service delivery models with health care partners; scale and spread promising and best practices and effective models throughout the state.
- Strategy 9: Provide public health expertise and serve as the convener to support and promote evidence-based prevention interventions across health care and early learning sectors.
- Strategy 10: Align public health priorities with relevant statewide health priorities outlined in Oregon's Action Plan for Health.
- Strategy 11: Adopt shared metrics and incentives with the early learning and health care delivery systems for collective impact.

### 3. Principles

- Improving population health requires cross-sector collaboration between public health; CCOs, hospitals and other groups within the health care sector; early learning and education; and community-based organizations. We will not see meaningful improvement in population health without cross-sector collaboration. (Statewide Public Health Modernization Plan)
- Existing opportunities for cross sector collaboration should be leveraged to the extent possible (i.e., community health assessments/improvement plans). (Public Health Modernization Manual)
- Collaborations should ensure a comprehensive spectrum of strategies are in place for shared priorities. The expertise that the public health system holds in prevention; policy, systems and environmental change; and evidence-based strategies to improve population health supports direct services to individuals, including clinical interventions. (Statewide Public Health Modernization Plan)

- Public health and health care must work together to ensure that every community member has access to high quality, culturally appropriate health care. This requires jointly developing and implementing solutions to address access barriers. (Public Health Modernization Manual)

#### 4. Strategies

- Leadership and governance: Ensure that health care and public health are represented on one another's governing boards. Leverage health care and public health funding to improve population health outcomes. (Public Health 3.0)
- Shared metrics and data: Establish common metrics that move health care and public health towards improvement in health outcomes and elimination of health disparities. Develop systems to share data in order to develop community health assessments, identify emerging health issues, and evaluate the effectiveness of new policies designed to improve health. (Public Health 3.0)
- Evidence-based practices: Collect and disseminate information on evidence-based clinical and population health strategies. Ensure that resources are invested in practices that are grounded in scientific evidence. Utilize evidence-based practices in the development of community health improvement plans. (Public Health Modernization Manual)
