DATA PLACEMAT: ACCESS TO EQUITABLE PREVENTIVE HEALTH CARE

COMMUNITY FEEDBACK

“There are no programs in my community that I can really get to easily. The closest is two hours away and late at night.”

- Community Engagement Survey Respondent

“Public Transportation available more affordably. Education of staff and facilities of outlier communities.”

- Community Engagement Survey Respondent

“Healthcare: access to needed goods and services, LGBTQ-friendly physicians, how to handle medical provider discrimination, LGBTQ people with disabilities etc. enough income to qualify”

- Community Engagement Survey Respondent

“Legal access. We need access to affordable and seasoned legal advice and representation. Health insurance enrollment and navigation. Too many queers are eligible for OHP and other insurances but do not know how to navigate the insurance world. Insured communities lead to better health outcomes.”

- Community Engagement Survey Respondent

Defining the goal

Goals are broad statements of what we're hoping to accomplish. Goals are aspirational, often stated without limits.

Examples:

- Improve oral health (*2015-2019 SHIP*)
- Improve immunization rates (*2015-2019 SHIP*)
- Expand access to health care services within and outside clinical settings using innovative delivery models (*Kentucky SHIP*)
- Eliminate barriers to primary care, including geographic and transportation inconveniences, lack of knowledge, unavailability of internet, and lack of insurance coverage (*Columbia Pacific CCO CHIP*)

Defining the goal

- What do we want to achieve by addressing this issue together?
- What are the desired end results related to this priority?
- How will we know we are successful?
- What communities experience behavioral health inequities?

For example: *The goal is to (effect, e.g. improve, decrease, etc.) the (problem/need/opportunity) of (target population) by/through (x mechanism).*
