Access Code:

Vision: Oregon will be a place where health and wellbeing are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientation, socioeconomic status, nationalities and geographic locations.

Meeting Objectives:

- Finalize goal
- Identify outcome measures

1:00 – 1:15 **Welcome, introductions and agenda overview**

1:15– 1:45 **Follow-up from last meeting – finalize goal**

1:45 – 2:45 **Identifying outcome measures**

2:45 – 2:50 **Public Comment**

2:50 – 3:00 **Wrap-up & Next Steps**

- Next meeting: October 28th – Policy level strategies

Welcome & introductions

Share name and pronouns

What are three identities you hold?

An identity is any aspect – or descriptor of yourself - that is important to you.

Getting clear on language

Vision: Oregon will be a place where health and wellbeing are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.

Goal: Broad statement(s) of what we're trying to accomplish within a given priority area to achieve the vision.

Outcome indicator: Long term measure that would indicate goal is achieved.

Strategy: Policy, community and individual level interventions needed to achieve the goal

Process indicator: Short term measure that would indicate strategy has been achieved.

Actions: Specific tasks needed to implement strategy

Getting clear on language - Example

Vision: Oregon will be a place where health and wellbeing are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.

Goal(s): Improve oral health

Outcome indicator: Percentage of adults who have lost all their natural teeth

Strategy: Increase access to sources of fluoridated water

Process indicator: Percentage of people in Oregon residing in areas served by optimally fluoridated water

Finalizing the goal

- Increase equitable access to and uptake of **community based preventive services** (e.g. community health workers, self management programs, nutrition access, harm reduction, social need screening and referral, etc.)
- Increase equitable access to and uptake of **clinical preventive services** (e.g. USPSTF A&B recommendations)
- Create an integrated, mutually reinforcing relationship between clinical and community based preventive services to improve the quality, equity, efficiency and effectiveness of services and interventions.

Process for measure identification

PUBLIC HEALTH DIVISION

Oregon
Health
Authority

Proposed process for measure development

- Goal: Identify 2-3 outcome measures for the priority
 - Communicate hoped for changes
 - May be long-term in nature (>5 years)
 - Model indicator for CHIPs and other implementers
 - Measure progress towards goal
- Process
 - Identify possible outcome measures from State Health Indicators and other data sources
 - Apply criteria to narrow measures
 - Identify baseline and target

Outcome vs process measures

Outcome measures align with the goal

Goal: Improve immunization rates

Outcome measure: Rate of two year olds who are fully vaccinated

Process measures align with the individual strategies

Strategy: Increase percentage of children who are vaccinated

Measure: Nonmedical exemption rates for preschool/childcare facilities

Proposed outcome measurement criteria

Criteria	Definition
Addresses health disparity	Data source measures health disparity
Community acceptance	Right measure for the issue, measure is easy to understand by all community members
Feasible	Data is already collected, or mechanism for data has been identified

State Health Indicators

State Health Indicator	Disparity	Feasible	Accepted?
Population without health insurance <i>(Oregon Health Insurance Survey)</i>	x	X	
Population to provider ratio <i>(Healthcare Workforce Reporting Program)</i>	x	x	
Prenatal care in the first trimester <i>(Birth certificate data)</i>	x	x	
Childhood developmental screening <i>(National Survey of Children's Health)</i>	x	x	
Effective contraceptive use among women at risk of unintended pregnancy <i>(BRFSS)</i>	x	x	
Late state colorectal cancer diagnosis <i>(Oregon State Cancer Registry)</i>	x	x	
Dental visits among children <i>(National Survey of Children's Health)</i>	x	x	
Childhood immunizations <i>(ALERT IIS)</i>	X	x
