

Authenticator App for Overs

Using an Authenticator App to Certify an Amendment

1. After creating an amendment in OVERS, click on the Amendment Affirmation link.

2. Select Authenticator from the drop-down menu button. This menu displays your certifying options. The options may be different for each user.

3. Open the authenticator app that you installed on your phone.

4. Make sure that the certify box is checked. Enter the code that appears in the authenticator app with no spaces and then click Verify Code.

Affirmations

Affirm the following:

I certify that this change truthfully reports medical information to the best of my knowledge and is submitted for inclusion on the vital record.

Enter the verification code from your Authenticator App.

Code:

Verify Code

Affirm **Authenticator** **Clear** **Return**

5. The screen will show that the code has been authenticated. Click Affirm to finish.

Affirmations

Affirm the following:
