

Quick Reference:

Sex Designation on Death Records

The OVERS system has five sex designation options for the decedent:

- Female
- Male
- Undetermined - Used in cases where the sex cannot be determined due to a medical condition.
 - (Prints as unknown on the death certificate.)
- Unknown - Used if sex cannot be determined after verification with medical records, inspection of the body, or other sources.
- X (non-binary) - Used for individuals whose gender identity is not exclusively male or female.
 - (Prints as X on the death certificate.)

Sex designation options appear on the following screens in OVERS:
