

Auto Populate Place of Injury

New functionality to the **Injury** page was introduced into OVERS on December 17, 2018. When a Medical Examiner or medical certifier selects **Home** for **Place of Injury**, OVERS can now populate the decedent’s residence address in the **Location of Injury** section with a simple check box. This means if the injury occurred in the decedent’s residence, the address will no longer need to be entered manually on the **Injury** page.

The details and screenshots are below.

Populate Place of Injury:

1. On the **Injury** page, under the **Place of Injury** dropdown list, select **Home**. Home is the general description of a dwelling. It can be either the decedent’s residence or any other home.

2. The **Use Decedent’s Resident Address** checkbox will appear under the **Location of Injury** title. Click the checkbox to populate the decedent’s address if the decedent passed away at their residence.

3. Once the box has been checked, the decedent's address from the **Residence Address** page will populate in the **Location of Injury** Section.

The screenshot shows a web form titled "Location of Injury". At the top, there is a checkbox labeled "Use Decedent's Resident Address" which is checked. Below this, the form is divided into several sections for address entry. The "Street Number" field contains "111", the "Pre Directional" dropdown is set to "N", and the "Street Name or PO Box, Rural Route, etc." field contains "Front". The "Street Designator" dropdown is set to "Street", the "Post Directional" dropdown is empty, and the "Apt. #, Suite #, etc." field is empty. Below these, the "City or Town" field contains "Portland", the "County" field contains "Multnomah", the "State" field contains "Oregon", the "Country" field contains "United States", and the "Zip Code" field contains "97201". There is a small home icon to the left of the "City or Town" field. Below the address fields, there is a text input field for "Describe how injury occurred:", a dropdown menu for "Injury Activity", and a section for "If transportation injury, Specify" with a dropdown menu and an "Other Specify" text input field. At the bottom right of the form, there are five buttons: "Validate Page", "Next", "Clear", "Save", and "Return". A red vertical line is drawn on the left side of the form, highlighting the "Use Decedent's Resident Address" checkbox and the address fields.

4. Note - The use of this functionality is not mandatory. You can manually update addresses at any time before or after the **Use Decedent's Residence Address box** is checked.

For assistance, please contact the OVERS Help Desk by calling 971-673-0279 Monday – Friday 8:00 AM – 5:00 PM.
