DATA TABLES INTRODUCTION

The 2024 Student Health Survey (SHS) provides important data that can improve our understanding of the challenges students face. The findings from the SHS can be used to bridge the knowledge gap between students and the adults and communities who support them to ensure that Oregon provides a safe, supportive, and equitable environment where all youth can thrive.

Results for your DISTRICT / SCHOOL are provided in these data tables.

These data tables show your district or school results by grade, compared to the statewide results. A table is included for every question in the survey, as well as for calculated variables (ex: PYD Benchmark) and recoded or collapsed responses (ex: has a disability/does not have a disability).

2024 results are presented in comparison to 2022 SHS data tables. Results for previous years are available on the Oregon Student Health Survey (SHS) Data Portal (https://www.bach-harrison.com/SHSDataPortal) (2024 results will be available on the portal by the end of June 2025).

Information required for Drug-Free Communities (DFC) Core Measure reporting is also included with these tables.

BY THE NUMBERS

Over 62,000 students participated in the 2024 SHS:

6th grade:	23,326
8th grade:	21,884
11th grade:	17,041
Total:	**62,251**

They represent:

- 139 Districts
- 533 Schools
- 35 Counties

The SHS was administered at schools between October 2024 and January 2025.

DATA TABLES

This section features results by grade for each question on the survey. A table is also included for calculated variables/recodes.

These tables show the percentage that marked each possible response for each question. Calculated variables or recodes that show the results for questions in a different way, such as combining responses (e.g., percentage of students who have one or more disabilities vs. those with no disabilities) or basing percentages on a subset of respondents (e.g., percentage who drank 5 or more drinks in row in past 30 days only among those who drank alcohol in past 30 days).

The 6th and 8th grade surveys consisted of a subset of questions on the 11th grade survey. Data for questions that did not appear on the 6th or 8th grade version are shown as “n/a” (not applicable). Response categories for questions with no respondents will show “0.0”.

DRUG-FREE COMMUNITIES CORE MEASURES REPORTING

DRUG-FREE COMMUNITIES

Risk factors are associated with drug use and other problem behaviors (delinquent and antisocial behavior, school drop-out and teenage pregnancy). While exposure to one risk factor does not determine if a child will have problems later in life, research shows that exposure to a greater number of risk factors increases a young person's risk exponentially.

The Drug-Free Communities (DFC) Support Program (https://www.samhsa.gov/about/offices-centers/csap), administered by the Center for Substance Abuse Prevention, is the nation's leading effort to mobilize communities to prevent and reduce substance use among youth.

More than 700 community coalitions across the country receive funding up to $125,000 per year to strengthen collaboration among local partners to create or strengthen infrastructure that reduces youth substance use. The grant funding for this requires specific data referred to as the Core Measures. We included additional questions about e-cigarette use for added context about substance use among youth.
DFC programs are required to report on four (4) categories:

- Alcohol;
- Tobacco;
- Marijuana; and
- Prescription drugs not prescribed by a doctor.

Required DFC Reporting
The table on the following page includes all of the information required for DFC reporting.

APPENDIX II: DRUG-FREE COMMUNITIES CORE MEASURES REPORTING

* For Past 30-Day Use, Perception of Risk, and Perception of Parental/Peer Disapproval, the "Sample" column represents the sample size - the number of people who answered the question and whose responses were used to determine the percentage. The "Percent" column represents the percentage of youth in the sample answering the question as specified in the definition.

APPENDIX III: METHODOLOGY

The 2024 SHS was designed to be administered online to 6th, 8th and 11th graders statewide in one classroom period to provide state- and county-level estimates.

The sampling frame is based on the Oregon Department of Education's (ODE) Fall Membership Report for 2023-2024 and consists of public schools in Oregon with 6th, 8th and 11th grade enrollment of at least 10 students within the grade. The following types of schools were excluded from the sampling frame:

- State run schools/Schools with no associated school district, such as:
  - Juvenile justice facilities
  - Treatment facilities
  - Boarding schools

HB 2656 requires districts to make the SHS available to students. Students may choose not to take the survey or may refuse to answer any question on the survey. Since the survey covers a comprehensive range of health-related topics, some of the questions can be considered sensitive. There are opportunities for districts, parents/guardians and students to choose whether or not to participate.

SHS uses an active notification/passive consent model for the survey. Once district approval is received, schools send Parental Notification letters to parents and guardians at least two weeks prior to survey administration to inform them of the upcoming survey and provide an opportunity to opt their student out of the survey. The parent letters were available in English, Spanish, Russian, simplified Chinese, Vietnamese and Somali. Students can also choose to opt themselves out of the survey or to skip over any question they do not want to answer.

OTHER IMPORTANT THINGS TO KNOW

- The online surveys were available in English and Spanish and had a Flesch-Kincaid Grade level of 6 (reader needs a grade 6 level of reading or above to understand it):
  - 6th grade: 6.0
  - 8th grade: 5.9
  - 11th grade: 6.4

- The longer the survey, the higher the drop-off (i.e., non-response) for questions that are towards the end. To minimize this, some question topics were rotated on a random basis:
  - School Climate, Absenteeism and Bullying
  - Mental Health
  - Healthy Body
  - Access to Care
  - Sexual Health, Dating Violence and Sexual Violence
  - Injury Prevention
  - Gambling, Substance Use and Drug-Free Communities

- School and district-level data are unweighted.

- The data are weighted by enrollment for state-and county-level estimates. State results are weighted to account for lack of participation from the one non-participating county.

- The participation rate for a large district (Salem-Keizer) was quite low, so caution should be used when interpreting results for Marion county.
