² For 1985 and 1988-1998, abortion estimates are based on reported in-state and out-of-state occurrences among Oregon residents. For years prior to 1985 (and in 1986-1987), abortion estimates were based on Oregon occurrences only but included abortions obtained by out-of-state residents. Because some neighboring states do not report abortions to the state of residence (especially California), this results in minimal estimates for both abortions and pregnancies.

--- Data not available.

All rates are per 1,000 females.

¹Pregnancy estimates are based on the total number of births and abortions.

² For 1985 and 1988-1998, abortion estimates are based on reported in-state and out-of-state occurrences among Oregon residents. For years prior to 1985 (and in 1986-1987), abortion estimates were based on Oregon occurrences only but included abortions obtained by out-of-state residents. This change permits closer comparison with the figures in Table 4-7 (and Table 4-5) but, because some neighboring states do not report abortions to the state of residence (especially California), this results in minimal estimates for both abortions and pregnancies.

³ Percentage of pregnancies resulting in a live birth.

--- Data not available.

Rates per 1,000 females 10-17 years of age. 2000: 190,123.

¹ All rates per 1,000 females.

² Total includes two births where county of residence was unknown.

* Detailed reporting of small numbers may breach confidentiality.

— Quantity is zero

§ Pregnancy rate is significantly different from the state.

NOTE: Includes births and reported abortions including those obtained out-of-state by Oregon residents. Because some states (e.g., California) do not record data on residence for abortion patients, all out-of-state abortions are not included.

WARNING: Rates based on less than 5 events are unreliable.

Yamhill	139	39.7	10	71.9	95	683.5	7	50.7

¹ Inadequate care began in the third trimester or number of visits is less than five.

² Rates per 1,000 females 15-19 years of age.

³ Rates per 1,000 births to 15-19 year olds.

– Number of events equals zero.

NOTE: Rates and percentages are calculated excluding missing and unknown values.

§ Rate is significantly different than the state rate.

WARNING: Rates based on less than 5 events are unreliable.
