<sup>1</sup> Pregnancy estimates are based on the total number of births and abortions.

<sup>2</sup> For 1985 and 1988 - current; abortion estimates are based on reports for Oregon residents whether occurring in Oregon or another state. For years prior to 1985 (and in 1986-1987), abortion estimates were based on Oregon occurrences only but included abortions obtained by out-of-state residents. This change permits closer comparison with the figures in Table 4-7 (and Table 4-5) but, because some neighboring states do not report abortions to the state of residence (especially California), this results in minimal estimates for both abortions and pregnancies.

<sup>3</sup> Percentage of pregnancies resulting in a live birth.

---Data not available.

Rates per 1,000 females 10-17 years of age. 2004: 199,235.
