<sup>1</sup> Pregnancy estimates are based on the total number of births and abortions.  
 See footnote (2) on the next page regarding changes in estimating abortions.  
 All rates are per 1,000 females.

<sup>2</sup> Abortion estimates are based on reports for Oregon residents whether occurring in Oregon or another state. For years prior to 1985 (and in 1986-1987) abortion estimates were based on Oregon occurrences only, but included abortions obtained by out-of-state residents. Because some neighboring states do not report abortions to the state of residence (especially California), this results in minimal estimates for both abortions and pregnancies.

All rates are per 1,000 females.
