

Hospitalization rates¹ per 100,000 population, Oregon 2017

Use unadjusted rates to estimate hospitalizations for individual conditions; use age-adjusted rates to compare among conditions.

	Unadjusted rate	Age-adjusted rate	Number of hospitalizations	Number of people ⁴
Alcoholic liver disease ³	26.6	25.0	1,059	870
Alzheimer's disease ³	6.9	6.0	241	220
Arthritis (osteoarthritis or rheumatoid arthritis) ³	503.5	398.4	17,533	16,460
Asthma ²	25.2	26.3	1,190	1,050
Cancer – Breast (female) ³	15.5	14.1	266	260
Cancer – Colorectal ³	38.5	33.5	1,324	1,260
Cancer – Lung ³	32.3	26.2	1,121	1,060
Cancer – Prostate (male) ³	68.0	50.9	1,098	1,090
Chronic obstructive pulmonary disease (COPD) ³	136.5	113.0	5,249	4,460
Diabetes ²	106.7	98.0	6,055	4,420
Heart attack ³	189.4	161.1	6,758	6,190
Heart disease (includes heart attack) ³	807.6	691.7	32,533	26,400
Stroke (including ischemic attack) ³	262.7	224.6	10,164	8,590

¹ Hospitalizations include only those where the indicated condition was the primary diagnosis. Rates are based on the number of hospitalized persons per 100,000 population. Hospitalizations do not include emergency department visits.

² Includes all ages.

³ Includes only adults ages 18 and over.

⁴ Rounded to the nearest ten people.

Source: Oregon hospital discharges dataset, 2017; age-adjustment is to the 2000 standard population.

Note: All rates are based on the number of persons hospitalized, not the number of hospitalizations.
