¹ Emergency department visits include only those where the indicated condition was the primary diagnosis. Rates are based on the number of persons visiting the emergency department per 100,000 population.

² Includes all ages.

³ Includes only adults ages 18 and over.

⁴ Rounded to the nearest ten people.

Source: Oregon emergency department dataset, 2017, collected by Apprise Health Insights, a subsidiary of the Oregon Association of Hospitals & Health Systems; age-adjustment is to the 2000 standard population.

Note: All rates are based on the number of persons with an emergency department visit, not the number of visits.
