

For the Year 2013 in Wallowa County, there were 17 tobacco related deaths and \$3.2 million in medical costs.

Prohibiting smoking in public places is one successful step toward reducing the harm of tobacco use.

**In April, 2014 the Wallowa School Board updated their policy to prohibit the use of tobacco, alcohol, or drugs on school grounds or while participating in school sponsored programs and activities.**

**Thank You!**

Thank You Wallowa School Board for  
Providing Substance Free School Grounds!
