## MEDICAL MARIJUANA INFORMATION BULLETIN 2025-02

**Subject:** New Rules Effective January 1, 2026

---

On January 1, 2026, OMMP's rule revisions related to patients, caregivers, growers, dispensaries, and processing sites will become effective.

All grow sites consent forms will be required to be notarized. A grow site consent form is required from the property owner if a patient or grower does not own the property where the grow site will be located. Notarized consent forms will also now be required if the applicant for a processing site does not own the property where the processing site will be located. [Information bulletin 2025-01](#) details information around this change. The new consent form can be found on the [Medical Marijuana Forms page](#).

Other rule changes include:

- Prohibiting medical marijuana dispensaries from being located within 1,000 feet of a public prekindergarten, kindergarten, or parochial program.
- Adding rules regarding co-location of licensed hemp and medical marijuana grow sites on the same property.
- New rules around product recalls.
- Modifications to rules related to how an application and when payment is to be submitted for dispensary and processing sites. In addition, when a refund of the registration fee may be made to dispensaries and processing sites.
