

February 2018 Update Free CME/CE Opportunities

Visit us online: [Website](#), [Facebook](#) or [Twitter](#)

Greetings AWARE partners,

Thank you for your continued commitment to antibiotic resistance education and prevention! This year, Oregon AWARE has begun to broaden its scope to include inpatient antibiotic stewardship in addition to the historical focus on outpatient efforts. Our hope is that this shift will allow increased opportunities to engage with you as we develop new resources and learning opportunities. Please feel free to contact us with requests for educational materials or ideas for future collaboration.

In the meantime, please take advantage of the free CME/CE activities highlighted below and share them with your partners!

All the Best,

Oregon AWARE

FREE CME/CE ACTIVITIES

Appropriate Use of Antibiotics and Management of Upper Respiratory Tract Infections

Complete this activity and receive .75 free CME/CE! The training outlines:

- Areas to improve antibiotic prescribing in Oregon
- Pathogens associated with upper respiratory tract infections and trends in resistance
- How to use antibiotics appropriately
