Influenza Hospitalizations

The Oregon Health Authority conducts population-based surveillance for laboratory-confirmed hospitalizations associated with influenza in Clackamas, Multnomah, and Washington counties during October 1 - April 30. To date, 83 hospitalizations have occurred during the 2025-2026 season. There were 16 hospitalizations reported during December 07, 2025 - December 13, 2025. The cumulative hospitalization rate for the 2025-2026 season is 4.6 per 100,000 people.

2025-2026 Influenza-Associated Hospitalizations		
Age Group (years)	N	Rate per 100,000 people
0-4	2	2.3
5-17	7	2.6
18-49	21	2.5
50-64	14	4.3
65+	39	13.0

Laboratory Data

7.4% of specimens tested for influenza were positive during December 07, 2025 - December 13, 2025. 40% of positive influenza specimens tested at the Oregon State Public Health Laboratory (OSPHL) this season are influenza A (H1N1), 60% are influenza A (H3), and 0% are influenza B. National laboratory trends can be found at [CDC FluView](https://www.cdc.gov/fluview/).

Oregon State Public Health Laboratory (OSPHL) Influenza Testing 2025-2026 Season

Avian Influenza

There has been 1 reported human case of highly pathogenic avian influenza (HPAI) H5N1 in Oregon. More information on avian influenza in humans is available from the [CDC](https://www.cdc.gov/). More information on avian influenza in animals is available from the [Oregon Department of Agriculture](https://www.oregon.gov/ODA/Pages/default.aspx).

Immunization Data

As of December 15, 2025, influenza immunization seeking in Oregon is declining each week. This decline is consistent with immunization patterns in past influenza seasons. Overall, the number of Oregonians seeking influenza immunizations this season is slightly lower than in the prior 2024-25 season.

For more information on Oregon influenza immunizations, including county, age and race/ethnicity trends, the OHA Influenza Immunization Dashboard is available at:
