### Influenza Hospitalizations

The Oregon Health Authority conducts population-based surveillance for laboratory-confirmed hospitalizations associated with influenza in Clackamas, Multnomah, and Washington counties during October 1 - April 30. To date, 1217 hospitalizations have occurred during the 2024-2025 season. There were 91 hospitalizations reported during February 02, 2025 - February 08, 2025. The cumulative hospitalization rate for the 2024-2025 season is 67.2 per 100,000 people.

2024-2025 Influenza-Associated Hospitalizations		
Age Group (years)	N	Rate per 100,000 people
0-4	21	24.5
5-17	47	17.8
18-49	253	30.2
50-64	269	82.4
65+	627	210.0

Rates of Influenza-associated Hospitalizations by Week and Age Group

2024-2025 Season

### Laboratory Data

24.0% of specimens tested for influenza were positive during February 02, 2025 - February 08, 2025. National laboratory trends can be found at [CDC FluView](https://www.cdc.gov/fluview/).

### Influenza-Associated Pediatric Mortality

During the 2024-2025 influenza season there have been 2 reported cases of influenza-associated pediatric mortality in Oregon. More information on influenza-associated pediatric mortality is available from the [CDC](https://www.cdc.gov).

### Avian Influenza

There has been 1 reported human case of highly pathogenic avian influenza (HPAI) H5N1 in Oregon. More information on avian influenza in humans is available from the [CDC](https://www.cdc.gov). More information on avian influenza in animals is available from the [Oregon Department of Agriculture](https://www.oregon.gov/ODA/Pages/default.aspx).

### Immunization Data

As of February 12<sup>th</sup> of 2025, weekly influenza immunization totals in Oregon are continuing to decline as the season progresses. Overall, the total number of influenza immunizations given in this season to Oregonians is similar to last season. Previously it was presented how adult, non-senior women each season have higher rates of influenza immunization than men. As a companion piece, this week a chart is included showing that adult men also tend to receive influenza immunizations later than women. For more information on Oregon influenza immunizations, including county, age and race/ethnicity trends, the OHA Influenza Immunization Dashboard is available at:
