

I am a carrier of *Candida auris*.

When caring for me:

- * Use gown and gloves (**contact precautions**).
- * **Perform hand hygiene** before/after my care.

Things to Know

- *C. auris* is a type of fungus (germ) that has become **highly resistant to antibiotics** (medicine).
- *C. auris* is not spread through the air. It **spreads by contact with a person with *C. auris*** or items they have touched. Wash your hands often.
- Healthcare staff will take **extra measures when caring for you** to keep from spreading the germs to others. The risk of *C. auris* infection to healthy people (family, friends) is low.
- You **may carry *C. auris* for a very long time**, even if you don't feel sick. Your doctor will let you know if you need treatment.
