AGENDA / BACKGROUND	Presenter(s)	Time
<b>Introductions – June – 5 min</b> <b>Overall Orpheus- Stephen – 15 min</b> <ul style="list-style-type: none"><li>Survey results: About 100 people responded to last month’s survey – About 80% were satisfied with Orpheus, and about 20% were not. The new server hasn’t resulted in better perceived performance. There is very little overlap between Orpheus users and Oregon Public Health Assessment Tool (OPHAT). About 30 state and local respondents (from 9 different counties) were willing to use a smart phone to authenticate instead of a fob.</li></ul>		Fobs will be deployed over the next several weeks.

### ELR updates –Michelle - 10 min

**New developments with 4 labs** that are waiting to be approved:

- **Mid Columbia** (started sending 9/11) are hoping to stop faxing.
- **Silverton Hospital**
- **Asante** {Rogue Valley, Three Rivers, and Ashland hospitals} (upgraded their message in early October).
- **Salem Hospital**

Other Updates:

- **Willamette Valley Medical Center** is actively testing and hoping to go live within the next few months
- **Kaiser** is working frantically to fix their messages and hope to be back to normal by the first of the year
- **Saint Alphonsus** and **Sky Lakes** are also in early development

### New Feature – Duplicate ELR button for Gonorrhea/Chlamydia ELRs

- You now have the ability to duplicate ELRs that come in with paired tests (e.g., Gonorrhea/Chlamydia). Go to the More Tab of the ELR Patient Detail and use the Duplicate CD ELR button (see figure below).

No objections for Mid-Columbia, Silverton, Asante, and Salem to stop faxing, pending final OK from Kathy from Klamath re: Asante.

The screenshot shows the Orpheus County ELR system interface. At the top, there are tabs for 'Search & Link', 'Lab Report', and 'More' (circled in red). A 'Search for Patient in Orpheus' button is also present. A red banner at the top center reads 'Success! Duplicate ELR created'. Below this, there are sections for 'Other ELR Records for patient', 'Matches from Message ID', and 'Matches from...'. The 'Matches from Message ID' section contains a table with columns 'Name', 'MR Number', and 'Lab Name'. The 'Matches from...' section contains a table with columns 'Name', 'MR Number', and 'Lab Name'. The 'Tests' section at the bottom left shows a list of tests, including 'CHLAMYDIA (T)' and 'Gonorrhea'. The 'Results' section at the bottom right shows a list of results, including '1 1 CHLAMYDIA G-A200 POSITIVE'. Annotations include: a dashed arrow pointing from the 'More' tab to the 'Success! Duplicate ELR created' banner; a yellow callout bubble pointing to the 'Duplicate CD ELR' button with the text 'after duplicating, change the disease field to the preferred disease'; a yellow callout bubble pointing to the 'Tests' section with the text 'you can re-order the tests so that the correct one displays on the case layout'; and a yellow callout bubble pointing to the 'Results' section with the text 'after duplicating, change the disease field to the preferred test name'. The 'Disease' field in the 'Duplicate CD ELR' button is circled in red and labeled 'Chlamydia'. The 'Duplicate ELRs' section shows a list of duplicate ELRs, including '20130409153462538931872512465637203SA' and '31596004'. The 'Disease' field in the 'Duplicate CD ELR' button is also labeled 'Gonorrhea'.

### Home screen timed refresh – should speed up loading of home page -- June

We've received a lot of negative feedback about performance lags when navigating back to the home screen. The navigation is dependent on various parameters, including number of cases that need to be refreshed on your home screen filter, new ELRs showing up on your home screen, etc.

The feature was removed due to performance issues. This really only applies to chronic Hep C cases who have moved to another county. If you'd still like to view the case, you'll need to keep the "Keep Active" box checked.

### STD updates – Irina – 10 min

#### Changes to notes

- The State STD use only field has been removed. All authorized users can see all notes.
- Matt recently developed the ability to txt notes. Outcome fields added. The note field has to have something in it in order to be texted.

The screenshot shows a software interface for creating a note. At the top, there are fields for 'Date' (11/19/2014), 'Type' (Note), and 'Assigned To' (Stephen Ladd-Wilson). Below these, there is a field for 'Agency' (OPHD 971-673-0138) and a checkbox for 'Task is complete'. A large text area for 'Note' is in the center. At the bottom, there is a 'Who' dropdown menu (set to Patient) and an 'Outcome' section with three radio buttons: 'Didn't Try', 'Tried, Failed', and 'Success'. Two yellow callout bubbles are present: one pointing to the 'Agency' field with the text 'New: Agency shows up with name to whom note is assigned', and another pointing to the 'Outcome' section with the text 'New: Outcome and "Who" fields added'.
