This form is for use in developing visual case analyses (VCA) for cases of sexually transmitted infection. These can serve as a resource for investigating clusters of sexually transmitted disease.

A set of instructions for VCA published in 1992 by Centers for Disease Control and Prevention for Disease Intervention Specialist training are provided with other forms related to Syphilis on the Oregon Public Health Division communicable disease reporting page (<a href="http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/ReportingCommunicableDisease/ReportingForms/">http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/ReportingForms/</a>).

Contact the Oregon STC Control Program 503-890-0153 if you would like assistance with conducting a VCA, or advice about whether VCA is appropriate for your case/s.
