**INFECTIOIN TIMELINE**

Enter onset date in heavy box.  
Count back to figure the probable exposure period.

Most persons shed infectious oocysts in stool during the period of diarrhea. Shedding may continue in some patients for several days—possibly longer.

Interviewed  yes  no      Interview date(s) \_\_\_\_\_      Interviewed by \_\_\_\_\_

Who  patient  provider  parent  other

Reason not interviewed (choose one)

- not indicated       unable to reach       out of jurisdiction       deceased  
 refused       physician interview       medical record review

**POSSIBLE SOURCE(S) OF INFECTION DURING EXPOSURE PERIOD**

*Risks* Provide ancillary details (names, locations, details) about possible sources and risk factors checked below, as appropriate. Ask about any leftovers including packaging or containers in the trash, collect some for testing. Contact ACDP for details.

*Skip this section if case is already epi-linked.*

- no risk factors could be identified  
 patient could not be interviewed
