Drug Resistance Patterns

Multi-Drug Resistance (MDR) n (%) 

MDR - at least INH & Rifampin 0 (0%)

Percentage of total cases with susceptibility testing (n = 66)

Other Drugs Isolates n (%) 

Rifampin (RIF) n=59 0 (0%)
Isoniazid (INH) n=59 4 (6.8%)
Pyrazinamide (PZA) n=59 11 (18.6%)
Ethambutol n=59 1 (0%)
Fluoroquinolone n=51 0 (0%)

Percentage of total cases with susceptibility testing

Co-infection with TB and HIV n (%) 

Cases with both HIV and TB 1 (1.4%)

Percentage of cases with known HIV status (n = 72)

Pediatric TB Cases n (%) 

0-4 Years of Age 1 (1.3%)
5-14 Years of Age 3 (4.1%)
Total Pediatric Cases 4 (5.4%)

Percentages of total TB cases (n = 79)

Nationwide Verified Cases of TB 

2020 U.S. Population Cases Rate** 

333,287,557 8,300 2.5

NOTE: This annual report is released each year in March, after the previous year's TB case counts are reported to the Centers for Disease Control & Prevention (CDC).

Analysis date: 3/17/2023

§ Cases are counted in county of residence at time of diagnosis
* Oregon population estimates obtained from the Population Research Center, Portland State University.
** Rate per 100,000 population. Caution should be used in interpretation of rates in counties with <5 cases, as rates may be unstable.
