**Oregon Norovirus Watch, November 2015.** This issue of Oregon Norovirus Watch includes norovirus outbreak data from the November 2014–November 2015 norovirus season. Since October 2015, 22 norovirus or norovirus-like outbreaks were reported, of which 5 (23%) were in schools, 12 (54%) were in nursing homes or assisted-living facilities, and 2 (9%) were restaurant-associated (see Fig. 1). Over the past year, 79/148 (53%) lab-confirmed and norovirus-like outbreaks occurred in nursing homes or assisted-living facilities. Non-GII.4 strains have been on the rise since July 2015 (Fig. 2), and were identified in 40/62 (64%) lab-confirmed outbreaks.
