

County Watch List Data

Counties are placed on the watch list when there is a sporadic case rate of ≥ 50 per 100,000 in the last two weeks and the county has >5 sporadic cases in the last two weeks.

Sporadic cases are those cases that cannot be traced to a source, which indicates community spread.

Counties remain on the watch list for a minimum of three weeks and until their sporadic case count drops below 50 per 100,000 or ≤ 5 cases in the previous two weeks.

The watch list helps policymakers and the COVID-19 response team to prioritize resources and assistance to the counties that are seeing the broadest spread of COVID-19. The assistance offered to a particular county depends on the assessment of its needs. Often it includes epidemiological assistance and staffing support. Presence on the watch list does not indicate that a county is being moved back a phase in reopening, nor is it punitive.

Two Week Monitoring Periods From Sept. 13 – Oct. 10

This table is based on data pulled at 12:01 AM on October 14, 2020. For county case rates, cases are assigned to a week based on their true case date, which is the date when public health first identified them as a confirmed or presumptive COVID-19 case. All data are provisional and subject to change.

County	Time Period	Case Count	Cases per 100,000	Sporadic Case Count	Sporadic Cases per 100,000
