

School Metrics Data

Oregon public health officials have developed evidence-based metrics to help school boards and school districts make decisions about how they can safely reopen schools. OHA is working closely with the Oregon Department of Education (ODE) on its Ready Schools, Safe Learners guidance for public and private K-12 schools for the 2020-21 school year.

For a school to return to in-person instruction through ODE's On-Site or Hybrid instructional models, the county metrics below must be met:

Metrics

- For a school district that draws substantial numbers (>10%) of students or staff from multiple counties, the case rate and test positivity rate should be considered in each of those counties.
- Schools must be in a county that is no longer in baseline phase to consider in-person instructional models.

Prioritize On-Site or Hybrid instructional models:

County Metrics - Large Counties (≥30,000 residents)

- » Case rate: <50.0 cases per 100,000 population in the preceding 14 days
- » Test positivity: <5.0% in the preceding 14 days

County Metrics - Small Counties (<30,000 residents)

- » Case count: <30 cases in the preceding 14 days
- » Test positivity: <5.0% in the preceding 14 days

Prioritize careful phasing in of On-Site or Hybrid instructional models for elementary schools:

County Metrics - Large Counties (≥30,000 residents)

- » Case rate: 50.0 to <100.0 cases per 100,000 population in the preceding 14 days
- » Test positivity: 5.0% to <8.0% in the preceding 14 days

County Metrics - Small Counties (<30,000 residents)

- » Case count: 30 to <45 cases in the preceding 14 days
- » Test positivity: 5.0% to <8.0% in the preceding 14 days

For more information on the metrics and on the exceptions to these metrics, visit

Weekly Monitoring Periods From Nov. 1 – Nov. 28

This table is based on data pulled at 12:01 AM on November 30, 2020. For case counts and case rates, cases are assigned to a week based on their true case date, which is the date when public health first identified them as a confirmed or presumptive COVID-19 case. For percent positivity in testing, lab results are assigned to a week based on the date their test result was reported to Public Health. All data are provisional and subject to change.

County	County Size	Time Period	Case Count	Cases per 100,000	Test Positivity
Oregon, statewide		11/01/2020 - 11/14/2020	11,443	270.1	6.4%
		11/08/2020 - 11/21/2020	14,734	347.8	7.0%
