

TREATMENT

SAVES LIVES

People with HIV are living longer, healthier lives.
We can prevent new HIV transmissions through treatment.

IN OREGON

An estimated

6,969

OREGONIANS

are living with HIV

From 2011 to 2015,
annually there were

257

new HIV diagnoses

HIV+ people with an undetectable viral load have
EFFECTIVELY NO RISK OF TRANSMITTING HIV
to their sexual partners

HIV treatment medications can

PREVENT TRANSMISSION FROM MOTHER TO CHILD

New HIV treatment medications combined with housing and supportive services make it possible for people to

LIVE LONGER, HEALTHIER LIVES

OREGONREMINDERS.ORG

will send text, email or voicemail reminders to take treatment medications, or prevention medications like PrEP

an Oregon Health Authority and community initiative
