STDs continued to surge in Oregon and across the U.S. in 2019.

- **19,279** cases of Chlamydia (460.0 cases per 100,000 people)
- **6,130** cases of Gonorrhea (146.3 cases per 100,000 people)
- **1,245** cases of Syphilis (29.7 cases per 100,000 people)
- **18** cases of Syphilis among newborns (11th highest state rate (41/100,000))

To prevent syphilis in newborns, all pregnant people should be screened 3 times: as early as possible, again at 28 weeks, and at delivery. Prompt and appropriate treatment is essential.

**Prevent the spread of STDs with three simple steps:**

- **talk**
- **test**
- **treat**
