

## **Instructions for Problem Corrected Notice - Template 1-6 and NC-7**

### Template on Reverse

It is a good idea to issue a notice when a serious violation or situation has been resolved. Although EPA regulations do not require such notices, your state may require you to issue one. You should coordinate with your local health department as well. You should use the same delivery methods you used for the original notice.

The template on the reverse is very general and can be used for any violation or situation. However, to help restore consumers' confidence in the water system, you should modify the notice to fit your situation. Although the public should have seen your initial notice, there may be additional information you learned after the notice was issued. Therefore, you should describe the violation or situation again and discuss how the problem was solved.
