

Survey Packets:

The water system survey forms are provided in three packets — one packet for Community and NTNC (C/NTNC) groundwater systems, one packet for Community and NTNC (C/NTNC) surface water systems, and one packet for Transient and Oregon Very Small water systems (TNC/OVS). The forms are included in packets so that the water system name, ID number, and survey date appear as a header at the top of every page and the page numbering is done automatically. The form packets are also designed to allow you to add or subtract as many pages as needed to accommodate systems with more than six wells or to include more than just one page of schematics, maps, or pictures.

The following form pages are included in each of the three packets:

Survey Page	Packet 1 C/NTNC Groundwater	Packet 2 C/NTNC Surface water	Packet 3 TNC/OVS
Deficiency Summary	X	X	X
Inventory and Narrative	X	X	X
Water System Schematic	X	X	X
Source Information*	X	X	X
Well Information	X	X	X
Spring/Other Source	X	X	
Conventional and Direct Treatment Plant Inspection		X	
Alternative Technology Treatment Plant Inspection		X	
Disinfection	X	X	X
Treatment*	X	X	
Storage & Pressure Tanks	X	X	X
Distribution System Information	X	X	
Water Quality Monitoring	X	X	
Management & Operations	X	X	
Transient (TNC) & Oregon Very Small (OVS)			X

*In the “C/NTNC” packets, treatment code definitions are listed on the back of the “Treatment” page, however, in the “TNC/OVS” packet, treatment codes are listed on the back of the “Source Information” page.

C = Community water system

NTNC = Non-Transient Non-Community water system

TNC = Transient Non-Community water system

OVS = Oregon Very Small water system: smaller systems with 4-14 connections or serving 10-24 people (formerly called Non-EPA, Non-Public, or State-Regulated water systems)
