

Infrastructure Project Process Flow

The process flow shown below is intended to represent key milestones in the Letter of Interest (LOI), application, and award management process for base Safe Drinking Water Revolving Loan Fund (SDWRLF) and Bipartisan Infrastructure Law (BIL)-General Supplemental infrastructure projects. The timeline from submitting the LOI to obtaining a potential funding award may take anywhere from 9 months to over a year.

This process flow is excerpted from the SDWRLF Program Handbook (October 2024 version), available [online](#). For more information about non-construction SDWRLF projects as well as the Drinking Water Source Protection Fund (Appendix C), Sustainable Infrastructure Planning Projects (SIPP) Program (Appendix D), or BIL-Emerging Contaminants (Appendix E), contact a Business Oregon [Regional Development Officer](#).
