

## Guidance for Tanning Lamp Equivalency Charts

- Look in the operator’s manual for the tanning device and find the lamps the manufacturer designates for the tanning device.

RECOMMENDED EXPOSURE TIMES IN MINUTES		MAXIMUM EXPOSURE TIME IS 20 MINUTES				
Skin Type:		Level 1/Week 1 1st-3rd Sessions	Level 2	Level 3	Level 4	Level 5
I Sensitive Skin (Burns easily and severely and does not tan.)		NOT RECOMMENDED FOR TANNING				
II Light	(Burns easily and severely and tans minimally.)	4	8	12	16	20
III Normal	(Burns moderately and tans average.)	6	10	15	20	20
IV Dark	(Burns minimally, tans easily and above average.)	8	12	16	20	20

New lamps emit approximately 10% more ultraviolet radiation during the first 50 hours of operation. Recommended tanning times should therefore be reduced by approximately 10% during that period.

**WARNING:** • Read the instructions booklet before using this sunlamp product. • All persons in the room should wear protective eyewear when lamps are on. Recommended eyewear: provided eyeshields or equivalent eyewear as defined under 21 CFR 1040.20. Other types of eyewear may not provide adequate protection. Failure to use protective eyewear may result in severe burns or other eye injury. If discomfort develops, discontinue use and consult a physician.

THE FOLLOWING LAMPS HAVE BEEN CERTIFIED FOR USE IN THE 336:  
 Velocity® Wolff® Model VEL 71-T12-100W (Bench lamps)  
 Velocity® EXTREME Wolff® Model VE 71-T12-100W Bi-Pin (Canopy lamps)

 Tango F71-T12-HO-BP 120W W ADAPTER

- Always get an equivalency chart from the supplier when you buy new lamps.
- Make sure the original designated lamps are listed next to the new lamps.
  - If the original lamps are not listed, they are NOT equivalent and cannot be used.
- These charts can be found by contacting the lamp manufacturer, your vendor, or searching online.

**Write device room number on the chart before submitting for State Inspection Response. Circle designated lamps and equivalent lamps on the chart.**
