Tanning Device Timer Test & Emergency Button Record

Timer tests are required to be completed with results recorded **once a year** for **each tanning device**. Timers must be accurate within 10%. If the timer does not pass, take the device out of service until the timer has been repaired.

Test the **emergency shut off button** located on the tanning device. Record whether the emergency button passes or fails. If the emergency button fails (does not work), take the device out of service until the emergency button has been repaired.

**Keep this record for inspector review **

Date	Bed or Room #	Employee	Set Time	Recorded Time	Timer Pass/ Fail	Timer Corrective Action	Emergency Button Pass/Fail	Emergency Button Corrective Action
mm/dd/yy	*Rm 1*	*First & Last Name*	*5 min*	*5:03 min*	*Pass*	*None*	*Pass*	*None*

Note: 10% of 2 min is 12 sec| 10% of 5 min is 30 sec| 10% of 6 min is 36sec| 10% of 10 min is 1 min| 10% of 20 min is 2 min
