

**Appendix C: Available laboratories for cyanobacteria testing**

When processing water samples for toxins as part of a toxin based monitoring program, OHA recommends sampling data be available within 3 business days after receipt of a sample. This helps OHA and the waterbody managers to meet the need for timely communication with the public, and demonstrates that action is being taken to protect the public’s health. For OHA purposes, electronic versions with official, final results will suffice.

**Aquatic Analysts**

43 Telegraph Lane, Friday Harbor, WA 98250  
(Identification and enumeration)

Attn: Jim Sweet  
phone: (503) 869-5032
