

## HEAVY METALS in SOIL

# Analytical Laboratories Servicing Oregon

For sampling in soil near pre-1978 construction, prioritize choosing soil labs from the [EPA National Lead Lab Accreditation Program \(NLLAP\)](#) list: <https://www.epa.gov/system/files/documents/2023-03/nllap.pdf>. These labs are required to meet stringent requirements for analyzing lead under EPA and HUD lead-based paint regulatory programs.

For sampling near structures that were constructed *after* 1978, see the following list of analytical laboratories that provide soil analyses for heavy metals (e.g., arsenic, cadmium, lead, etc.).

This list should be used for informational purposes only and is not intended to be an endorsement by the Oregon Health Authority of any laboratory. To find additional laboratories, visit <http://lams.nelac-institute.org/search> (Use search term 'EPA 3050B' or 'EPA 6000' under the Method tab entry). This will retrieve labs that use the EPA's method "6000 series" to test for lead.

Some labs may not accept residential soil samples, so it is important to contact the lab before sending a sample. Testing prices and shipping costs will vary; contact the lab for more information.

### **Hall Environmental Analysis Laboratory, Inc.**

4901 Hawkins Rd. NE, Suite D  
Albuquerque, NM 87109  
505-345-3975; FAX 505-345-4107  
<http://hallenvironmental.com/>

### **Fremont Analytical, Inc**

3600 Fremont Ave N.  
Seattle, WA 98103  
206-352-3790; FAX 206-352-7178  
[info@fremontanalytical.com](mailto:info@fremontanalytical.com)
