
**Welcome to the
Maternal Infant Early Childhood
Home Visiting (MIECHV)
Orientation 2020**

MATERNAL AND CHILD HEALTH
Public Health Division

Agenda

- 10:00 Welcome & Introductions
- 10:10 MIECHV Overview & Available Supports
- 10:25 Data Reporting, Collection & Forms
- 11:10 CQI Overview
- 11:25 Closing

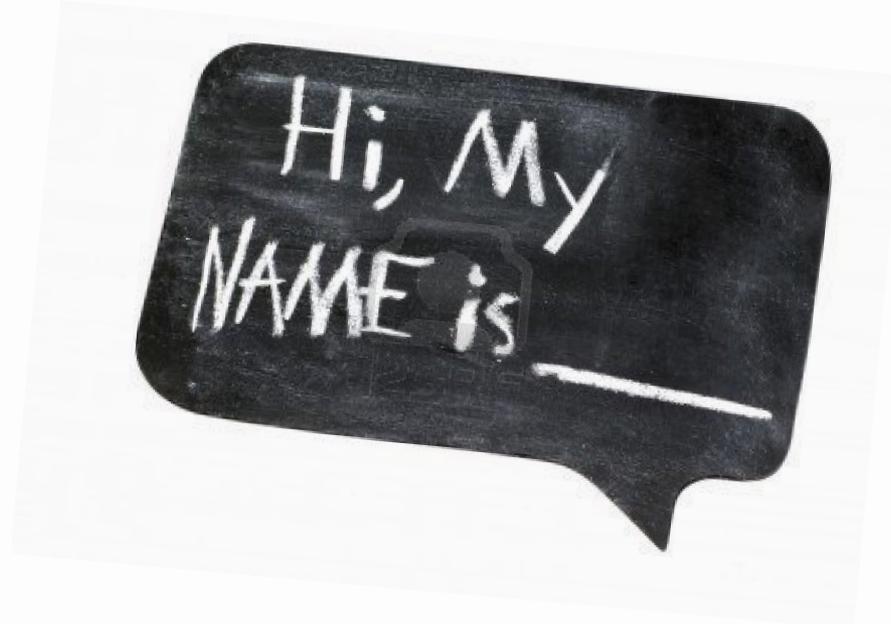

Session Overview

Objectives

1. Learn about Oregon MIECHV implementation and grant expectations
2. Discover resources available to promote your success in: orienting yourself or other new staff, data collection, Continuous Quality Improvement (CQI) and professional development
3. Learn the basics of data collection
4. Introduce statewide Continuous Quality Improvement (CQI) efforts

Introductory Icebreaker:

- Tell us your
 - Name
 - Role
 - Agency
 - What do you hope to learn on this webinar?

Oregon MIECHV Staff

Jordan Kennedy
Community Systems Manager

Zach Owens
Fiscal Analyst

Benjamin Hazelton
Home Visiting Manager

Ramila Bhandari
Administrative Specialist

Tina Kent
Data Manager

Kerry Cassidy-Norton
Workforce Development Coordinator

Drewallyn Riley
CQI Coordinator

Grant Administration

The Project Director:

- Plans the activities of the grant
- Coordinates implementation of grant activities
- Monitors activities and the work of contractors
- Reports on the outcomes

Additionally:

- Represents local and state programs
- Supports activities to align the local and state home visiting network

Authorization and Administration

- Authorized by the Social Security Act
- Administered by:
 - Health Resources & Services Administration (HRSA) (States)
 - Administration for Children & Families (ACF) (Tribal grantees)
- Bipartisan Budget Act 2018

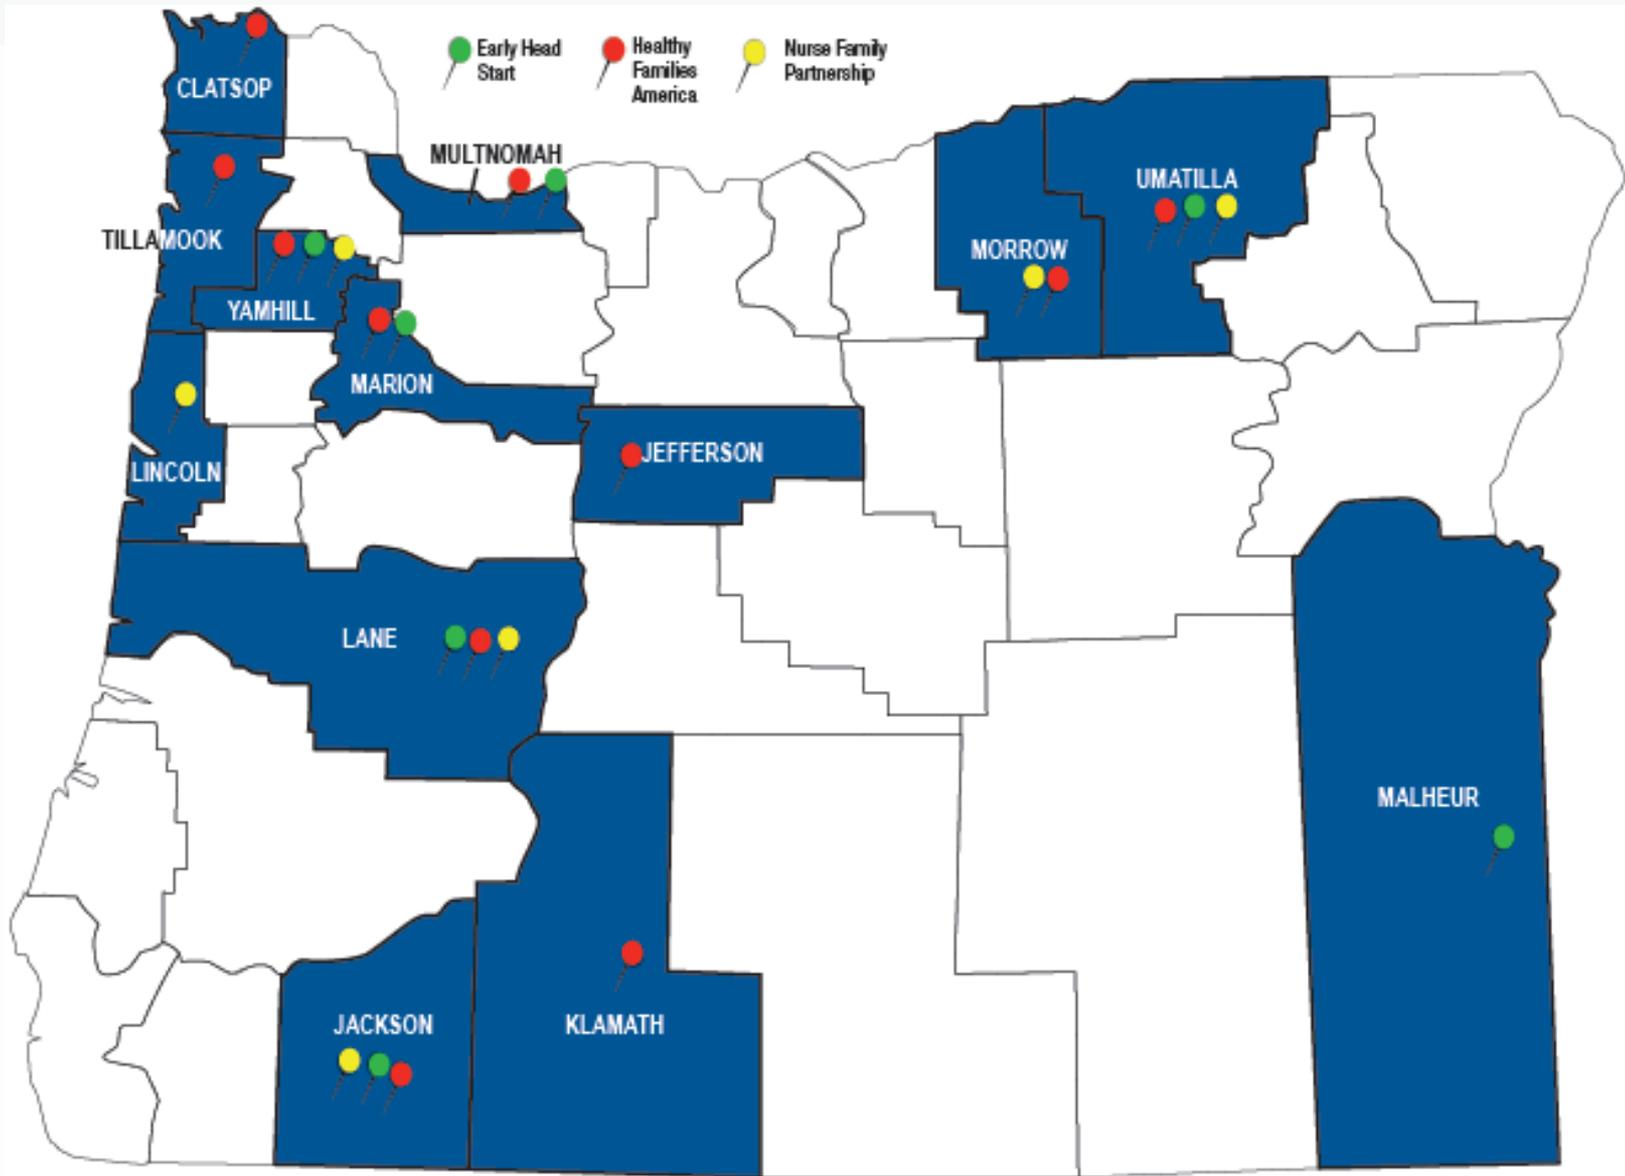

Two Fundamental Grant Objectives

- Expanding Evidence-Based Home Visiting Services
 - ✓ Early Head Start (EHS)
 - ✓ Healthy Families America (HFA)
 - ✓ Nurse-Family Partnership (NFP)
- Developing the Infrastructure to Support Sustainability
 - ✓ Coordinated Service Entry and Integration within a Comprehensive Early Childhood System
 - ✓ Continuous Quality Improvement
 - ✓ Workforce Development

MIECHV Implementation in Oregon

- 21 organizations providing home visiting services across 28 programs in 13 communities
- Oregon MIECHV enrollment capacity is 916 families
 - EHS: 185
 - HFA: 256
 - NFP: 475

Workforce Development

Oregon's Home Visiting workforce, serving families prenatally through age five, is prepared to promote and support optimal development of infants, young children and their families. Oregon families will receive culturally and linguistically responsive and relationship-focused home visiting services, provided by a workforce that demonstrates a common set of core competencies.

Vision

Oregon
Health
Authority

MIECHV Professional Development Assistance

Workforce Development Coordinator Provides:

- Coordination of:
 - regional in-person trainings
 - On-line learning opportunities
 - Scholarship opportunities

- Professional development resources

- 1. Cultural and Linguistic Responsiveness:**
Commit to understanding individuals and families within their cultural context and providing appropriate supports.
- 2. Dynamics of Family Relationships and Engagement:**
Understand the complexity and diversity of family relationship, dynamics, and systems while working in partnership with families for the best interest of children.
- 3. Family Health and Well-Being:**
Establish and maintain environments and supports that promote children's health, safety, nutrition, physical activity and adaptations for special needs, in partnership with families.
- 4. Family Self Sufficiency:**
Actively engage family members in identifying and working towards self-sufficiency, as defined and desired by the family.
- 5. Human Growth and Development:**
Apply the principles of development across the lifespan, including child growth and development; value each family member's unique biology, interests, needs and potential while nurturing relationships, starting with healthy infant-caregiver attachment.
- 6. Professional Best Practices:**
Work with families in a professional, reflective manner; adhere to ethical standards, regulations and laws pertaining to the home visiting field.
- 7. Professional Well Being:**
Examine one's own thoughts, attitudes, feelings, actions, strengths and challenges; seek appropriate supports and engage in self-care activities to ensure ability to effectively support families.
- 8. Screening and Assessment:**
Use appropriate tools and methods for understanding child interactions, knowledge and skills as a means to support the child's development and make appropriate referrals for further evaluation.
- 9. Service System Coordination:**
Understand the value of partnerships and collaborations between families and agencies/ organizations to meet family needs.
- 10. Social Emotional Well-being:**
Understand supportive strategies for encouraging social emotional development and addressing challenging behaviors, and recognize the influence of temperament and emotional regulation capacity on behavior.

Workforce Development

Regional Training

- Partner with Early Learning Hubs

Scholarships

- Formal Education

Home Visiting
Core
Competencies

Online Learning

- Orientation
- Resource library
- Self Paced Learning

Partnerships

- Conferences
- Institutes

MIECHV Performance Measures: Data Collection and Reporting

Objectives

1. Participants are knowledgeable about the 6 benchmark measures and 19 performance indicators
2. Participants are familiar with Data Collection processes and where to access resources
3. Participants can articulate the link between MIECHV benchmark measures and performance indicators, and the MIECHV data collection forms they complete

Why do we collect these data?

- Required for all MIECHV grantees
- Demonstrates the work of MIECHV at a national level
- Supports quality improvement efforts
- demonstrate measurable improvement over time

Benchmark	Measure	Target Population	Measurement	Collection Schedule	Data Source
Maternal and Newborn Health	(1) Preterm Birth	Pregnant women enrolled in home visiting prior to 37 weeks gestation	Percent of infants who are born preterm following program enrollment	EHS/HFA: Enrollment-Parent, Enrollment-Child NFP: Enrollment-child	EHS/HFA: M1- Enrollment-Parent M4-Enrollment-Child NFP: MIECHV Infant Birth
	(2) Breastfeeding	Infants (among mothers enrolled prenatally) who reached six months of age during the reporting period	Percent of infants (among mothers enrolled prenatally) who received any amount of breast milk at age six months	EHS/HFA: Enrollment-Child, Child's Age: 6, 12, 18, 24 months NFP: Infant birth, 6, 12, 18, 24 months	EHS/HFA: M4- Enrollment-Child M4-Baby's Age 6 mos-Child M12-Baby's Age 12 mos-Child M14-Baby's Age 18 mos-Child M17-Baby's Age 24 mos-Child NFP: MIECHV Infant Birth Infant Health Care (6, 12, 18, 24 months)

BENCHMARK TABLE

Benchmark	Maternal and Newborn Health
Measures	<ol style="list-style-type: none"> 1. Percent of infants (among mothers enrolled in home visiting prenatally before 37 weeks) who are born preterm following program enrollment. 2. Percent of infants (among mothers who enrolled in home visiting prenatally) who were breastfed any amount at six months of age. 3. Percent of primary caregivers enrolled in home visiting who are screened for depression using a validated tool within three months of enrollment (for those not enrolled prenatally) or within three months of delivery (for those enrolled prenatally). 4. Percent of children enrolled in home visiting who received the last recommended visit based on the American Academy of Pediatrics (AAP) schedule. 5. Percent of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within eight weeks (56 days) of delivery. 6. Percent of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and who were referred to tobacco cessation counseling services within three months of enrollment.
Benchmark	Child Injuries, Abuse, Neglect and Maltreatment and Emergency Department Visits
Measures	<ol style="list-style-type: none"> 7. Percent of infants enrolled in home visiting that are always placed to sleep on their backs, without bed-sharing or soft bedding. 8. Rate of injury-related visits to the Emergency Department (ED) since enrollment among children enrolled in home visiting. 9. Percent of children enrolled in home visiting with at least one investigated case of maltreatment following enrollment within the reporting period.
Benchmark	School Readiness and Achievement
Measures	<ol style="list-style-type: none"> 10. Percent of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool. 11. Percent of children enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories and/or sang songs with their child daily, every day. 12. Percent of children enrolled in home visiting with a timely screen for developmental delays using a validated parent-completed tool. 13. Percent of home visits where the primary caregivers enrolled in home visiting were asked if they have any concerns regarding their child's development, behavior or learning.
Benchmark	Crime or Domestic Violence
Measure	14. Percent of primary caregivers enrolled in home visiting who are screened for interpersonal violence (IPV) within six months of enrollment using a validated tool.
Benchmark	Family Economic Self-Sufficiency
Measures	<ol style="list-style-type: none"> 15. Percent of primary caregivers who enrolled in home visiting without a high school degree or equivalent who subsequently enrolled in, maintained continuous enrollment in, or completed high school or equivalent during their participation in home visiting. 16. Percent of primary caregivers enrolled in home visiting who had continuous health insurance coverage for at least six consecutive months.
Benchmark	Coordination and Referral for other Community Services
Measures	<ol style="list-style-type: none"> 17. Percent of primary caregivers referred to services for a positive screen for depression who receive one or more service contacts. 18. Percent of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool) who receive services in a timely manner. 19. Percent of primary caregivers enrolled in home visiting with a positive screen for IPV (measured using a validated tool) who receive referral information to IPV resources.

What types of data are collected for MIECHV?

- Demographic Information
- Priority Populations (e.g. low income households, pregnant women under 21)
- Client Caseload
- Home Visiting Staffing
- Number of Home Visits
- Screening Results (ASQ-3, PHQ-9, RAT) and referrals
- Follow-up Questions

**MIECHV
Benchmarks**

BENCHMARKS

Improved maternal and newborn health

Improved school readiness and achievement

Improved family economic self-sufficiency

Reduced child injuries, abuse, and neglect

Reduced crime or domestic violence

Improved coordination and referrals for community resources

MIECHV Data Collection & Reporting Assistance

MIECHV Data Manager provides:

- Data Reporting Process assistance
- Data verification and quality assurance
- OHA/DHS Secure Email assistance
- Ongoing contact and support
- THEO Training & Application Support

How does EHS & HFA collect data when using THEO?

- Home visitors collect data during home visits; data is either directly entered into THEO or recorded on forms
- Data is entered into THEO within **2 weeks**
- Forms are to be completed according to client schedule (at enrollment and periodically after)
- The MIECHV data team retrieves data from THEO and produces data reports

Overview

Home Visiting is a method for strengthening families and improving the health of children and parents. Home Visitors meet with families and provide family support, share resources and work on skill building. The Maternal, Infant and Early Childhood Home Visiting (MIECHV) Program, also known as the Federal Home Visiting Program, is an investment in home visiting programs.

MIECHV is administered by the Health Resources and Services Administration's (HRSA) Maternal and Child Health Bureau in collaboration with the Administration for Children and Families (ACF) which administers Tribal MIECHV grants. [Learn more about the Federal Home Visiting Program.](#)

The MIECHV program works toward improvement in the following benchmarks:

1. Improved maternal and child health
2. Prevention of childhood injuries, child abuse, or maltreatment, and reduction of emergency department visits
3. Improvement in school readiness and achievement
4. Reduction in crime or domestic violence
5. Improvements in family economic self-sufficiency
6. Improvements in the coordination and referrals for other community resources and supports

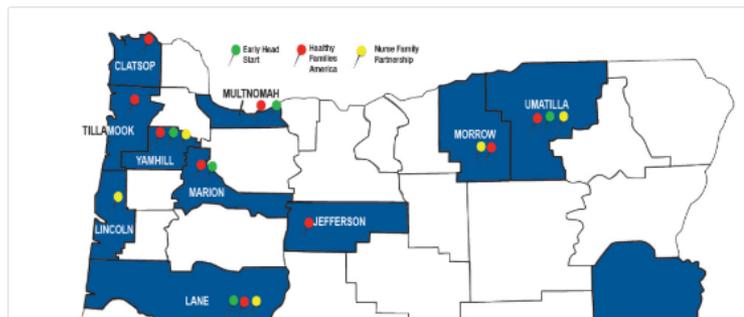

Local home visiting programs work to show improvement in 19 benchmark measures. See below for more detailed information on MIECHV benchmark measures.

In Oregon, MIECHV funds the following evidence based home visiting models:

- Early Head Start
- Healthy Families America
- Nurse Family Partnership

The funded programs are in 13 counties, determined by the Home Visiting Needs Assessment.

MIECHV Program Data Collection and Entry for Working Remotely

[MIECHV Program Data Collection and Entry for Working Remotely](#)

****UPDATED 4.24.2020**** A document that provides guidance and resources on MIECHV data collection and entry for local implementing agencies (LIAs) when home visitors are working remotely.

Updated Data Collection Schedule

[EHS/HFA Data Collection Schedule 2020](#)

****UPDATED 3.31.2020**** Data Collection Schedule is available to support home visitors in completing client data forms on-time. It can be filled out for each client.

The schedule includes four tabs:

- Tab 1: "Instructions"
- Tab 2: "Process Map"
- Tab 3: "Prenatal Mom Enrolling"
- Tab 4: "Parent and Child Enrolling"

Please note: The schedules look best when printed as a PDF rather than an Excel document.

The Excel data collection schedule will be replaced in the future with an automated tool within THEO. Implementation timeframe for automated tool TBD.

MIECHV Benchmark Measures: Brief Version

Oregon Health Authority

Benchmark	Measure	Target Population	Measurement	Collection Schedule	Data Source
Maternal and Newborn Health	(1) Preterm Birth	Pregnant women enrolled in home visiting prior to 37 weeks gestation	Percent of infants who are born preterm following program enrollment	Enrollment-Parent, Enrollment-Child	M1-Enrollment-Parent M4-Enrollment-Child
	(2) Breastfeeding	Infants (among mothers enrolled prenatally) who reached six months of age during the reporting period	Percent of infants (among mothers enrolled prenatally) who received any amount of breast milk at age six months	Enrollment-Child, Child's Age: 6, 12, 18, 24, 30, 36 months	M4-Enrollment-Child M9-Baby's Age 6 mos-Child M12-Baby's Age 12 mos-Child M14-Baby's Age 18 mos-Child M17-Baby's Age 24 mos-Child M20-Baby's Age 30 mos-Child M25-Baby's Age 36 mos-Child
	(3) Depression Screening	Primary caregivers with at least three months enrollment	Percent of primary caregivers screened for depression within three months of delivery (for those enrolled prenatally) or within three months of enrollment	Within 3 months of Child's Enrollment	M5-Child's Enrollment Tool-Parent

Connecting Benchmarks Measures and Performance Indicators to Data Collection: Exercise

Example: Maternal Depression Screening and Referrals

You are getting ready to conduct a home visit with a mom who gave birth 1 month ago. You note in the client schedule she needs to have a PHQ-9 screening for maternal depression.

- What forms are used for maternal Depression Screening and Referral?
- When are these forms due by (what is their time window for completion)?
- You are unsure what type of referrals you could give for depression. What resources can you use to help answer this?
- What benchmark measures is this data collection providing information for?

Maternal Depression Forms and Resources

2019 MIECHV Data Collection & Reporting Schedule - NFP

Child: Lulu Duck
Child ID: 1234561

Parent: Daisy Duck
Parent ID: 123456

 No, other reason → Please specify _____

1c. If No, reason why PHQ-9 not completed:
 Concern previously identified

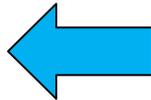

**M2B
MIECHV REFERRALS TRACKING & FOLLOW-UP - INDEX PARENT**
Please send this form to the State MONTHLY with updates (due by the 15th of the following month)

Name of Home Visitor: _____
Home Visiting Program: Early Head Start Healthy Families Oregon Nurse-Family Partner
Parent ID #: _____
Name of Index Parent: _____

Type of Service	INITIAL REFERRAL	FOLLOW-UP
	Date Referred to Service	Date Service Started/Received
1) Depression	/ / 20	/ / 20
1A) Depression	/ / 20	/ / 20
1B) Depression	/ / 20	/ / 20
1C) Depression	/ / 20	/ / 20

Referral Guidelines: A referral to services can be made directly by calling a community service agency and requesting services for the parent or by giving the parent a list of resources to call for assistance.

Referral Definitions:

NFP Chapter 4, Addendums to NFP Forms & Instructions

1) Depression:

Referrals include those made for maternal depression. These referrals may include but are not limited to: mental health treatment, therapy, counseling, or primary care or other provider for prescription management. Please use your nursing judgment and talk with your supervisor if you are unsure if a referral you are making should be counted as a referral for depression treatment or services.
