

Oregon Title V MCH Strategies: Food Insecurity

What Is Food Security?

Food security for a household means access by all members at all times to enough food for an active, healthy life. Food security includes at a minimum:

- The ready availability of nutritionally adequate and safe foods
- Assured ability to acquire acceptable foods in socially acceptable ways (that is, without resorting to emergency food supplies, scavenging, stealing, or other coping strategies)

....and Food Insecurity?

Food insecurity is the limited or uncertain availability of nutritionally adequate and safe foods or limited or uncertain ability to acquire acceptable foods in socially acceptable ways.

What is Hunger?

Hunger is a potential consequence of food insecurity that, because of prolonged, involuntary lack of food, results in discomfort, illness, weakness, or pain that goes beyond the usual uneasy sensation. USDA uses the description “very low food security”.

Food insecurity is a household-level economic and social condition of limited access to food, while hunger is an individual-level physiological condition that may result from food insecurity.

Strategy Number	Strategy name/brief description	Sample local level activities	Implementation Resources
1	Screen & intervene: screen clients for food insecurity and provide referrals for food assistance	<p>Implement a validated food insecurity screening tool, e.g. Hunger Vital Sign or Oregon WIC question</p> <ul style="list-style-type: none"> • Screen in programs such as Home Visit, WIC & School-Based Health Centers <p>Address client risk factors that may increase vulnerability to health impacts of food insecurity</p>	<p>Hunger Vital Sign Hunger Vital Sign Translation English to Spanish WIC Food Insecurity Resources (scroll down)</p> <p>Childhood Hunger Screening & Intervention Algorithm</p> <p>Addressing Food Insecurity: A Toolkit for Pediatricians Nutrition Supports for Health Clinics- a toolkit with great resources that is downloadable after registering</p>
