

Free Transportation is Available to RHAF Enrollees

NEMT (Non-Emergency Medical Transportation) services are available to clients who are enrolled in RHAF in most counties*. To receive the services clients must call their local brokerage which can be found on our [Help with Transportation webpage](#). NEMT services for RH clients works the same as they do for OHP clients.

Please note that clients must already be enrolled in RHAF to be eligible for NEMT services. If you have a new client who needs transportation services, they can complete the RHAF enrollment form [over the phone or via video calls](#). This would allow the client to seek transportation services for their first RH visit at your clinic.

We recommend making the following resources available at your clinic to help RHAF enrollees access this service.

Help Getting a Ride postcards - [English](#) | [Spanish](#)

NEMT: RHAF Enrollee User Guide - [English](#) | [Spanish](#)

*NEMT services for RHAF enrollees are not yet available in: Benton, Lincoln, and Linn

New Oregon Department of Justice Website on Reproductive Health Care Resources

The Oregon DOJ Office of Attorney General has recently released a website with reproductive health care resources.

This toolkit is intended to provide information about people's legal rights when it comes to accessing reproductive health care, including abortion, in Oregon. It answers questions to common legal questions, information on financial support, and a free, confidential hotline staffed by Oregon lawyers. Please share information about this website widely with your clients and partners. And as a reminder, the Reproductive Health Program's Abortion Access in Oregon website remains an up-to-date resource for individuals looking for information about abortion: Oregon.gov/abortion.

Trainings

Webinar: Centering Patient-Centered Approaches to Contraception in Perimenopause (Tuesday, August 26, 12:00-1:30)

This webinar, led by Deborah Rotenberg, JD, will offer critical insights and practical knowledge to enhance clinic practice and support patients through perimenopause and menopause. Reproductive health providers are vital in supporting patients through these significant life stages. This session will provide the latest information on the pathophysiology, symptomatology, contraception options, and patient-centered management strategies for perimenopause and menopause.

Learning Objectives

1. Define and understand the pathophysiology of perimenopause and menopause.
2. Describe the most common symptoms of perimenopause and menopause.
3. Explain the contraception options in perimenopause.
4. Support a patient-centered approach to the management of perimenopausal and menopausal symptoms.

Webinar: Essential Cybersecurity to Protect Sensitive Clinic Data (Thursday, August 28, 12:00-1:00)

Cybersecurity threats are prevalent now more than ever. This webinar, held in partnership between RNTHC and the HITEQ Center, intends to help clinic leaders build a strong foundation for their agency's cybersecurity. We will guide you through practical yet crucial steps your clinic can take to protect sensitive information, keep digital systems secure, and strengthen defenses against common online risks. We'll cover how to set up basic network protections, secure your computers, and handle data safely.

Recorded Podcast: STI Express Visits

In this episode of Clinical Chats, the CTC-SRH speaks with Amy Weber, WHNP, to discuss the Denver Sexual Health Clinic's approach to STI express visits for patients. They explore how the clinic streamlines STI testing, result management, and treatment, while also addressing implementation challenges and space for future innovations.
