

The background features a light brownish-pink color. On the left and right sides, there are dark brown branches of a citrus tree, possibly lemons or oranges, with several yellow fruits and green leaves. In the lower-left corner, a parrot with green, blue, and white feathers is perched on a branch, facing right.

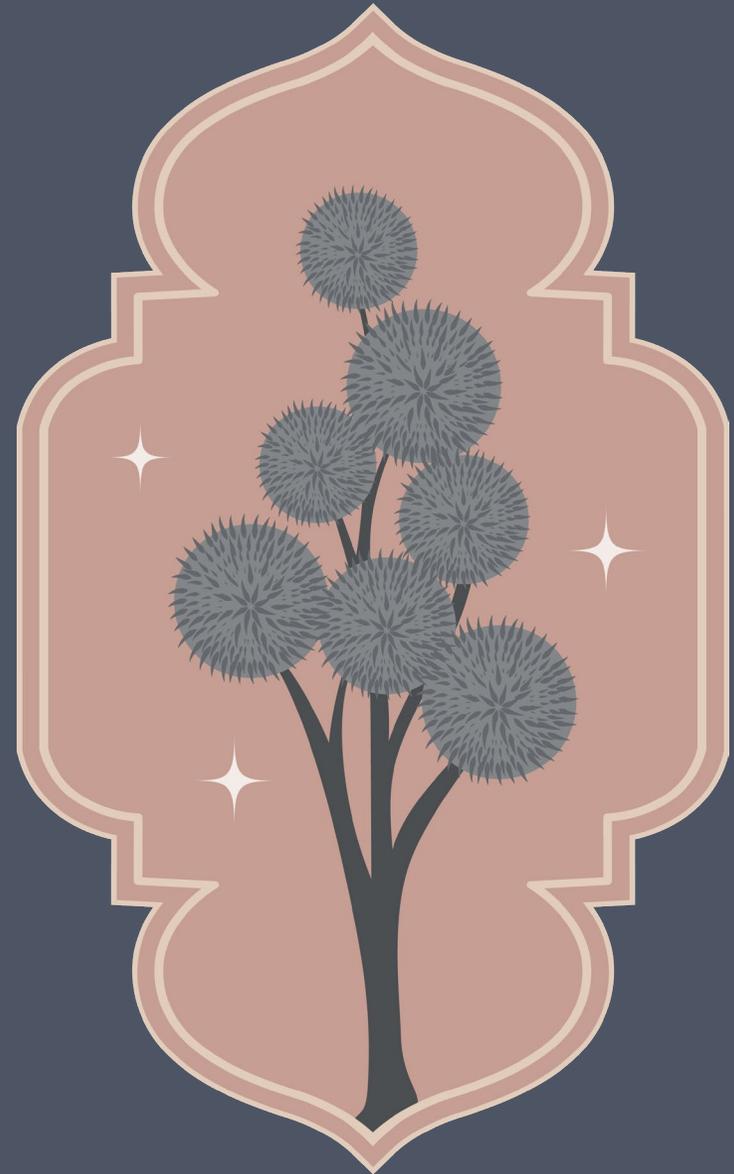

THANK YOU FOR  
JOINING THE  
FEBRUARY LAWN  
MEETING!

We will begin shortly.

# LOCAL AGENCY UPDATES

# WELCOME, KELLI!

(WASHINGTON CO.)

- I earned my BS in Nutrition and Dietetics from Brigham Young University-Provo and completed my dietetic internship through Cal State Polytechnic University Pomona.
- I worked as a Public Health Nutritionist for 5 years with the PHFE-WIC program in Southern California and then took a break to focus on my family, while periodically moonlighting in nutrition and education in both professional and volunteer capacities.
- My family and I moved here in 2005 and love it! I have 5 children in various stages of life; they keep me very entertained. If I am not attending to a sporting or musical event or mishap of theirs, then I am enjoying the outdoors as much as possible- usually trail running or hiking. I dabble in jigsaws (the puzzle and not the tool) and at the piano, but I especially enjoy being around people and getting to know them.
- I am thrilled to be back within the WIC and Public Health Community, especially here in beautiful Oregon.

# WELCOME, JACQUI AND VIVIAN!

## Jacqui Umstead, BSN, RN (she/her)

Jacqui has a Bachelor of Science in Nursing. She has worked in a variety of specialties including Emergency Nursing, diabetes education, primary care, pediatrics, lactation and public health. Jacqui worked with the local public health authority for 8 years and has been with the Oregon Health Authority's Newborn Screening program for the past 3 years.

## Vivian Siu, MPH, MURP (she/her)

**Vivian** is a research analyst with the Family and Child Health section of the state Public Health Division, OHA. She has over 10 years of public health experience supporting both EHDI and BASS programs. Her responsibilities include identifying needs patterns, conducting surveillance activities, improving data quality, analyzing and communicating key observations to the public to strengthen these public health programs.
