

For Similac Advance (SIA-P) or Similac Soy Isomil (SOY-P) Powder		
If the infant is getting this much supplemental formula each day:		Assign this amount of Similac Advance (SIA-P) or Similac Soy Isomil (SOY-P) powdered formula:
0 - 3 oz. per day	→	1 can powder per month
4 - 6 oz. per day	→	2 cans powder per month
7 - 9 oz. per day	→	3 cans powder per month
10 - 12 oz. per day	→	4 cans powder per month
13 - 15 oz. per day	→	* 5 cans powder per month
16 - 18 oz. per day	→	* 6 cans powder per month
19 - 21 oz. per day	→	* 7 cans powder per month
22 - 24 oz. per day	→	* 8 cans powder per month
25 - 27 oz. per day	→	* 9 cans powder per month

* This quantity may exceed the maximum allowed as determined by infant age and category.

NOTES:

- One can of Similac Advance powder (SIA-P) and Similac Soy Isomil powder each yield 90 ounces of reconstituted infant formula.
- Use the formula job aids to find the reconstitution for other types of formula and calculate the number of cans per month a participant would need.
