POLICY
Local programs shall provide a mid-certification health assessment (MCHA) for participants with a one-year certification period. During the MCHA appointment, participants shall receive a complete assessment and be provided with appropriate nutrition education, anticipatory guidance, breastfeeding promotion and support, and referrals.

PURPOSE
To ensure participants certified for greater than 6 months continue to receive quality nutrition services and education.

DEFINITIONS
Mid-Certification Health Assessment (MCHA): A complete health assessment with appropriate nutrition education, anticipatory guidance, breastfeeding support and referrals that occurs approximately in the middle of a one-year certification. This is an expanded nutrition education appointment, not a certification. The MCHA must be completed by a Competent Professional Authority.

PROCEDURE
MCHA Requirements
1.0 Participants certified for a one-year period shall be scheduled for a MCHA with a Competent Professional Authority between the fifth and seventh month of their twelve-month certification period.
1.1. The MCHA shall include a complete assessment, appropriate nutrition education and referrals for the participant. At a minimum, a complete MCHA includes:

1.1.1. Length and weight or height measurements
1.1.2. Diet assessment
1.1.3. Health assessment
1.1.4. Hemoglobin or hematocrit when appropriate (see ♦625—Risk Assessment)
1.1.5. Immunization screening and referral when appropriate (see ♦481—Immunization Screening & Referral Protocol)
1.1.6. Category, age, and developmentally appropriate anticipatory guidance and dietary recommendations
1.1.7. Updated food package assignment as appropriate
1.1.8. Referrals as appropriate
1.1.9. Breastfeeding assessment, support and encouragement for continued breastfeeding when appropriate

Document in the data system

1.2. Document in the data system at the time of the MCHA:

1.2.1. Length/height and weight measurements
1.2.2. Hemoglobin or hematocrit test results, if obtained
1.2.3. Additional risk factors, if applicable
1.2.4. Diet assessment questionnaire
1.2.5. Health assessment questionnaire
1.2.6. Food package changes
1.2.7. Nutrition education provided
1.2.8. Referrals made

Referral Data

1.3. Participants may bring in height and weight measurements from another provider taken within 60 days of the MCHA appointment.

1.4. A documented hemoglobin or hematocrit result performed by a medical provider within the biochemical screening guidelines for the participant’s category may be used. (See ♦626--Hemoglobin and Hematocrit Screening in WIC.)

1.5. Document the date the referral data was obtained in the “Medical Data” tab in the data system. In the “Notes” field, document the provider and the date of the actual MCHA appointment. (see ♦601—Physical Presence Requirement at Certification and ♦625—Risk Assessment.)
Scheduling the MCHA

2.0 The MCHA may be done as an individual appointment or a group appointment as long as the activities described in ¶1.0 are performed.

2.1. The data system will automatically generate an individual MCHA appointment request as MW for women, MI for infants or MC for children following a certification appointment.

2.2. The MCHA may be counted as one of the three required quarterly NE contacts during a one-year certification period. (See ♦820—Nutrition Education: Participant Contacts.)

2.2.1. Schedule the participant for a second nutrition education contact 2 to 3 months before and after the MCHA appointment. High-risk participants must be scheduled for two appointments with the registered dietitian per one-year certification period. The MCHA appointment may be one of these appointments. (see ♦661—Competent Professional Authority: Appropriate Counseling for Risk Levels.)

2.3. Participants transferring into Oregon after the seventh month of their one-year certification period do not need a MCHA. Instead, schedule them for a second nutrition education contact before the end of their certification period. (see ♦650—WIC Transfers/VOC and WIC Overseas Program)

Rescheduling Missed MCHA

3.0 Do not withhold benefits if the MCHA is not completed on time or if the participant refuses the appointment.

3.1. If the initial MCHA appointment is missed, contact the participant to reschedule the appointment. Once two-way communication is made and the appointment is rescheduled, issue only one month of benefits at a time until the MCHA is complete or the participant’s next recertification appointment. Other quarterly NE options may not substitute for the MCHA. (see ♦840—Documentation of Nutrition-Focused Education and Counseling.)

3.2. If the participant refuses the MCHA appointment at the time of certification, document refusal in the "Family Appointment Record" under "NE Refusal." (See ♦840—Documentation of Nutrition-Focused Education and Counseling)
