Module A Templates in TWIST

Module A Templates in TWIST reflect common "swaps" or modifications used for participant food packages. Module A swaps include:

- Milk types
- Swapping Milk for Cheese
- Swapping Milk for Yogurt
- Swapping Milk for Tofu
- Combinations of these swaps!

Using templates can reduce the amount of work needed to tailor a food package to best meet the participant needs.
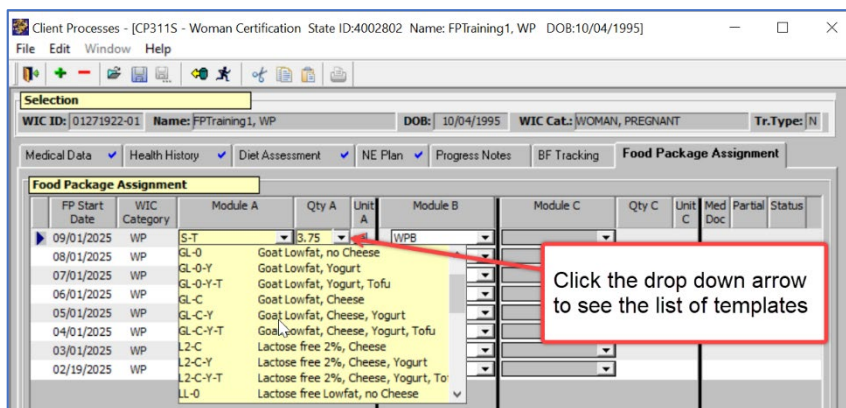

For example, a participant wants Soy Milk and Tofu in their food package and no Cheese or Yogurt. There's a template for that: "S-T" (Soy or Plant-based Beverage, Tofu). Here's what it does:

- Changes Milk to Soy and Plant-based Beverages,
- Reduces 1 qt of Soy Milk, and
- Adds 1 ctr of Tofu

If there are no other modifications to the food package, this can be forecasted.

Where do I find the templates in TWIST?

The templates are found on the Food Package Assignment Screen

Here is a list of the Module A templates available in TWIST, listed in the order found in the drop-down menu.

Each template automatically makes the modification, or swap for the foods included.
