Program Updates

Eligibility Update

ScreenWise has expanded its definition of "underinsured" to include insured individuals who cannot afford breast or cervical cancer diagnostic services. Our Enrollment Forms were changed to reflect this change. The form now asks whether out-of-pocket costs for diagnostic services pose a financial hardship. If a client answers "Yes" to this question, they have met the program's underinsurance requirement. Please note: these individuals must also meet other program eligibility criteria (residency, income, age).

Billing Update

It may take up to 2 weeks for ScreenWise to manually input claims into our system. Depending on when the claim is received and the volume of submissions, the claim may not be entered and processed during the month it was received. In such cases, it will be entered and processed in the next payment cycle. Claims are batched and processed on or around the 20th of each month, with Explanation of Benefits (EOB) reports emailed to billing contacts around the 25th. The primary function of an EOB is to provide a summary of claims received, paid, or denied for the billing cycle. Payments can be expected within 30 day of the process date.

New Materials

ScreenWise has a great new range of provider and client-facing materials available for outreach. Please call our office at 971-673-0581 or email ScreenWise.info@state.or.us to request client postcards or posters.

Provider Spotlight: Alida Raynor, LPN, CN-BC

As the Patient Navigator in Mammography Services at Mid-Columbia Medical Center, Alida Raynor is passionate about creating accessible services for patients in her community. After learning about ScreenWise program changes, Alida used her connections to bring together four enrolling providers in her community. In partnership with ScreenWise, Alida helped organize a provider network meeting which featured a presentation by program staff, discussion about referral networks in the community, and general Q&A. This meeting resulted in a more coordinated provider network that is better positioned to offer ScreenWise services to women in their community.

Do you have questions about how you can convene a similar meeting in your community? Contact Gretchen Caplener, ScreenWise Quality Assurance Coordinator at Gretchen.l.Caplener@state.or.us

Client Story: Kyung Mi Song

I am Korean immigrant who came to the US with my 2 sons for their education and worked in a restaurant for many years while my husband stayed and worked in Korea to support us. I did not have any health insurance but, through my church friend, I was introduced to Asian Health and Service Center (AHSC). I learned about all their different programs including the women's health program and was able to get my women's health annual exam through the ScreenWise program. After the clinical breast exam, the doctor found a lump and I received a mammogram, ultrasound, and biopsy. I was so afraid and unaware at first, worried about my children and what would happen with my life, but with the support and encouragement of the AHSC staff and all their assistance through the whole navigation and follow-up process, I was able to get through the whole experience confidently. And since we found the lump at an early stage, I had a simple surgery to remove it and found that it was benign. I have continued to receive annual follow-up exam checkups. I am so thankful for AHSC and the ScreenWise program, especially for their help in empowering me to care for myself, exercise regularly, eat healthy, and proactively get screening for breast and cervical cancer prevention.

Thank you,
 Kyung Mi Song

OHSU Knight Cancer Community Partnership Program

The OHSU Knight Cancer Institute Community Partnership Program is funding projects that build sustainable collaborations between organizations and Oregon communities addressing community-identified cancer needs. Applicants can choose from three tiers of grants depending on the type of project being implemented. In addition to grant funding, successful grantees are supported within the program through technical assistance, webinars, and networking opportunities. In June 2016, potential applicants will have the opportunity to attend a one-day workshop: "Putting Public Health Evidence into Action." This optional workshop is open to all prospective applicants, and attendance is encouraged.

RFPs are released in January and July of each year. For more information, visit the website or contact the OHSU Community Relations and Outreach team at KnightCancerCRO@ohsu.edu or 503 494-1617, option six.

Medicaid EHR Incentive Program

What is the Medicaid EHR Incentive Program?
This program provides federal incentives, up to $63,750 paid over six years, to eligible

providers who adopt, implement, upgrade, or achieve meaningful use of certified electronic health record technology (CEHRT).

- [Eligible professionals](#) must choose to participate in either the Medicare or Medicaid EHR Incentive Program.
- Most, but not all, of [eligible hospitals](#) in Oregon meet the federal requirements to participate in both the Medicare and Medicaid EHR Incentive Programs.

For more information about the program: Please visit the [Medicaid EHR Incentive Program website](#) or contact the Medicaid EHR Incentive Program team at 503-945-5898 (Salem).

Komen Lunch for the Cure

April 21, 2016 11:00am -

1:15pm

Komen Oregon and SW Washington's Lunch for the Cure brings together business and community leaders who recognize the importance of investing in saving lives and ending breast cancer. With the 10th anniversary of the Lunch, it will be a fun-filled afternoon which showcases the impact of the last decade, raising funds for critical services – education, screening, and providing financial and emotional support during and after treatment for underserved people in Oregon and SW Washington, and funding promising research at OHSU Knight Cancer Institute and Providence Cancer Center.

For tickets and further information: http://komenoregon.org/events/lunch-for-the-cure/2016/default.aspx

[Celebrate Kate!](#)

Please join us on June 3rd in the PSOB Café (800 NE Oregon St, Portland, OR 97232) from 2-4 pm, to recognize Kate, who retired after over 15 years of service.

If you can't attend in person but would like to send a message for us to share with Kate, please email that to screenwise.info@state.or.us

Professional Development Opportunities

Trauma Informed Care Training & Implementation Forum
April 21st

To understand the benefits of a trauma informed system, it is necessary to understand how trauma impacts individuals and families. Trauma Informed Oregon is excited to be able to provide this free foundational training and forum in the Tri-County area. The afternoon workshop forum is for people who are familiar with the core principles of trauma informed care and want to focus on next steps.

FOR MORE DETAILS AND TO REGISTER FOR THE TRAINING AND/OR FORUM:
