

Oregon School-Based Health Center (SBHC) Data Appendix, 2021 – 2022

Data reported below includes the period from July 1, 2021 to June 30, 2022 and are from encounter visits and the SBHC State Program Office Operational Profile database.

Unless otherwise noted, this data is for all ages served in SBHCs.

SBHC encounter and operational profile data			
Data type		Value	
Number of certified SBHCs in Oregon		80	
SBHC population served		40,069 clients in 126,673 visits	
Number of Oregon school-aged youth (5–21 years) with access to an SBHC		66,014	
SBHCs with PCPCH recognition		46%	
SBHCs sponsored by FQHCs		74%	
SBHCs sponsored by LPHAs		34% (25% have FQHC status)	
		All ages	Ages 5-21
Health coverage status of SBHC clients at first visit	Medicaid	51%	59%
	Private insurance	25%	21%
	Reproductive Health Access Fund	1%	1%
	Other public	8%	1%
	None or unknown ¹	15%	18%
Average number of visits per client		3.1	
Male: percent of clients, percent of visits		44% clients, 38% visits	
Female: percent of clients, percent of visits		56% clients, 61% visits	
Other: percent of clients, percent of visits		< 1% clients, 0.4% visits	
School-aged youth (5–21 years): percent of clients, percent of visits		65% clients, 70% visits	

¹ “None or unknown” categories include some clients who have insurance, but for whom insurance information is not captured in the data for a number of reasons: It is not a billable visit; it is a confidential visit, so insurance is not billed; student does not know or provide evidence of their insurance.

White: percent of clients	71%
White, non-Hispanic: percent of clients	52%
Hispanic: percent of clients	22%
Black: percent of clients	4%
Asian: percent of clients	3%
American Indian or Alaska Native: percent of clients	2%
Native Hawaiian or other Pacific Islander: percent of clients	1%
Unknown race and ethnicity: percent of clients	12%
Percent of school-aged youth (5-21 years) who had a comprehensive well visit	39%
Percent of visits with an immunization administered	16%
Percent of visits with a reproductive health-related service	9%
Percent of visits via telehealth	17%
Oral Health	
Percent of visits with an oral health provider	1%
Number of school-aged youth (5-21 years) who received dental sealants	191
Number of school-aged youth (5-21 years) who received dental fluoride varnish	1250
Number of school-aged youth (5-21 years) who received a dental screening	524

Behavioral Health	
SBHC population served by a behavioral health ² provider	6,281 clients in 42,464 visits
Percent of visits with a behavioral health provider	33%
Average number of behavioral health visits per client	6.6
Percent of behavioral health visits via telehealth	26%
White: percent of school-aged youth (5–21 years)	76%
White, non-Hispanic: percent of school-aged youth (5–21 years)	54%
Hispanic: percent of school-aged youth (5–21 years)	26%
Black: percent of school-aged youth (5–21 years)	5%
Asian: percent of school-aged youth (5–21 years)	3%
American Indian or Alaska Native: percent of school-aged youth (5–21 years)	4%
Native Hawaiian or other Pacific Islander: percent of school-aged youth (5–21 years)	1%
Unknown race and ethnicity: percent of school-aged youth (5–21 years)	6%

Student Satisfaction Survey Data

Each year, all certified SBHCs are required to survey a sample of clients aged 12 – 19 years who share their experience of healthcare services they receive during their visit at their SBHC. Surveys are completed by either iPad or paper form and are anonymous and confidential.

The number of SBHCs participating and student satisfaction surveys collected during the 2021-2022 school year was substantially fewer than usual. Thirteen SBHCs administered the survey to a total of 192 students between the ages of 12 and 19. Therefore, SPO is unable to provide student satisfaction survey data this year.

² Behavioral Health is used in this report to encompass mental health, behavioral health, and substance use services
