

Title: Updated Measles Investigative Guidelines - February 2026

Dear Partners,

The Oregon Health Authority (OHA) Measles Investigative Guidelines (IGs) have undergone a general revision for clarity. This update focuses on streamlining language, and removal of duplicative or outdated content. As part of this effort, the guidelines have been significantly shortened across all sections, including those relevant to healthcare settings.

Due to the scope and breadth of changes, a highlighted version is not being provided. The most current guidelines are now available on our [website](#). (Full website address is provided, below.)

If you have any questions, please contact Dr. Howard Chiou (howard.chiou@oha.oregon.gov).
