

Oregon Psilocybin Services 2025 Year-End Data Summary Document

Document Purpose: To provide annual totals of available data on regulated psilocybin services in Oregon, presented on the Oregon Psilocybin Services (OPS) Data Dashboard, to serve as an archive of data from 2025 and to provide access to information for those outside the U.S. who cannot access the OPS Data Dashboard.

Overview:

Oregon Psilocybin Services administers [ORS 475A](#), which was passed in November 2020 by Oregon voters and directs the Oregon Health Authority to license and regulate the production of psilocybin and provision of psilocybin services. [Senate Bill 303 \(SB 303\)](#) was passed in 2023 and codified into law in [ORS 475A.372](#) and [ORS 475A.374](#), requiring collection and sharing of certain data provided by clients and licensed service centers.

Data in this document comes from multiple sources. The OPS Training program, Licensing, and Compliance (TLC) system is an online platform where applicants can apply for training program curriculum approval, psilocybin licenses, and worker permits, as well as enter product tracking data in the Product Tracking System (TLC-PTS). In addition, TLC includes licensing and compliance data and a data reporting portal where service centers report required SB 303 data (TLC-303) in accordance with requirements under [ORS 475A](#) and [OAR 333-333](#). OPS has access to all TLC-PTS and TLC-303 data and monitors activity to ensure compliance.

When a client completes a [303 Client Data Form](#) they have an option to opt-out of having their data compiled and submitted to OHA. They can also select “do not want to answer” to any of the questions.

Note: Each data point listed below that has a definition or description in statute ([ORS 475A](#)) or rule ([OAR 333-333](#)) will include a reference [in brackets] following the brief description of the data point. For more detailed information please visit the [OPS Data Dashboard webpage](#).

OPS follows Oregon Health Authority standards for data reporting. Published data has sensitive values removed, or suppressed, each quarter so that sensitive, identifiable information is not shared (e.g., less than 12 responses for that response option). When a specific data point was not reported to protect confidentiality during all four quarters of 2025, it is listed as “not reported to protect confidentiality” in this document.
