

November 6, 2025

To Licensed Laboratories,

On October 24, 2025, new and updated administrative rules were adopted and will go into effect on January 1, 2026. This letter describes some of the important changes related to licensed laboratories. For a complete description of new and updated rules, please read the [2025 OPS Rules with Tracked Changes](#).

Psilocin on Psilocybin Product Labels

OPS made important changes to label rules to implement legislation and provide greater clarity to clients and facilitators about product potency. The Oregon Legislature amended ORS 475A to require psilocin content to be listed on psilocybin product labels, and OAR 333-333-2400 has been adjusted to reflect this requirement. OPS made additional changes to require product labels to display any other values regarding available, potential or equivalent psilocin or psilocybin that are identified by the laboratory who performed potency testing. Detailed information on compliance with revised label rules has been included in the attached Product Label and Potency Letter. We share this information with laboratory licensed so that you may work with manufacturers to provide required information to comply with amended rules.

Potency Information Document

OPS amended OAR 333-333-5000 to require that the [Psilocybin Product Potency Information Document](#) is discussed with clients during a preparation session. Discussion of this document was recommended but not required previously. This document supports client decisions on selecting a product type and dose that aligns with their intentions for the administration session.

Compost

OAR 333-333-8000 was amended to allow licensed laboratories to dispose of psilocybin waste by composting in the same manner as licensed manufacturers.

Thank you for your continued engagement in the administration of the nation's first regulatory framework for psilocybin services. We appreciate your partnership.

Sincerely,
The Oregon Psilocybin Services Section
