

November 6, 2025

To Worker Permit Holders,

On October 24, 2025, new and updated administrative rules were adopted and will go into effect on January 1, 2026. This letter describes some important changes to the renewal process for worker permits and product label requirements. OPS has published a [letter to the public](#) describing the rulemaking process and highlighting decisions that were made for final administrative rule changes. OPS has also sent letters to licensees describing relevant changes for each license type. For a complete description of new and updated rules, please read the [2025 OPS Rules with Tracked Changes](#).

OPS amended OAR 333-333-4070 renewal requirements for worker permits. Under the amended rule, a permittee who submits a timely renewal application at least 60 days before their permit expires may continue to work under their prior permit after the expiration date while their renewal application is pending. If the application is untimely, permittees may not work under their prior permit after the permit expires, but the permit renewal application will be processed. Permitted workers that do not apply to renew their permit before expiration will have to start a new worker permit application.

OPS also amended rules to enable efficient collection of unpaid civil penalties for administrative violations. Under the amended rules, failure to pay a civil penalty imposed by final order is a basis to deny renewal applications for worker permits and licenses.

OPS made important changes to product label rules to implement legislation and provide greater clarity to clients and facilitators about product potency. In the 2025 legislative session, the Oregon Legislature amended ORS 475A to require psilocin content to be listed on psilocybin product labels, and OAR 333-333-2400 has been adjusted to reflect this requirement. OPS made additional changes to require product labels to display any other values regarding available, potential or equivalent psilocin

or psilocybin that are identified by the laboratory who performed potency testing. Detailed information on compliance with revised label rules has been included in the attached Product Label and Potency Letter. We share this information with worker permit holders to make them aware of revised label requirements for psilocybin products they may handle in the course of their job duties. All products in a service center must be compliant with revised label rules effective January 1, 2026.

Thank you for your continued engagement in the administration of the nation's first regulatory framework for psilocybin services. We appreciate your partnership.

Sincerely,
The Oregon Psilocybin Services Section
