Greetings Licensed Manufacturers,

Please share this information with permitted workers who have access to your TLC-PTS account.

There is 1 new feature in TLC-PTS (the product tracking system)!

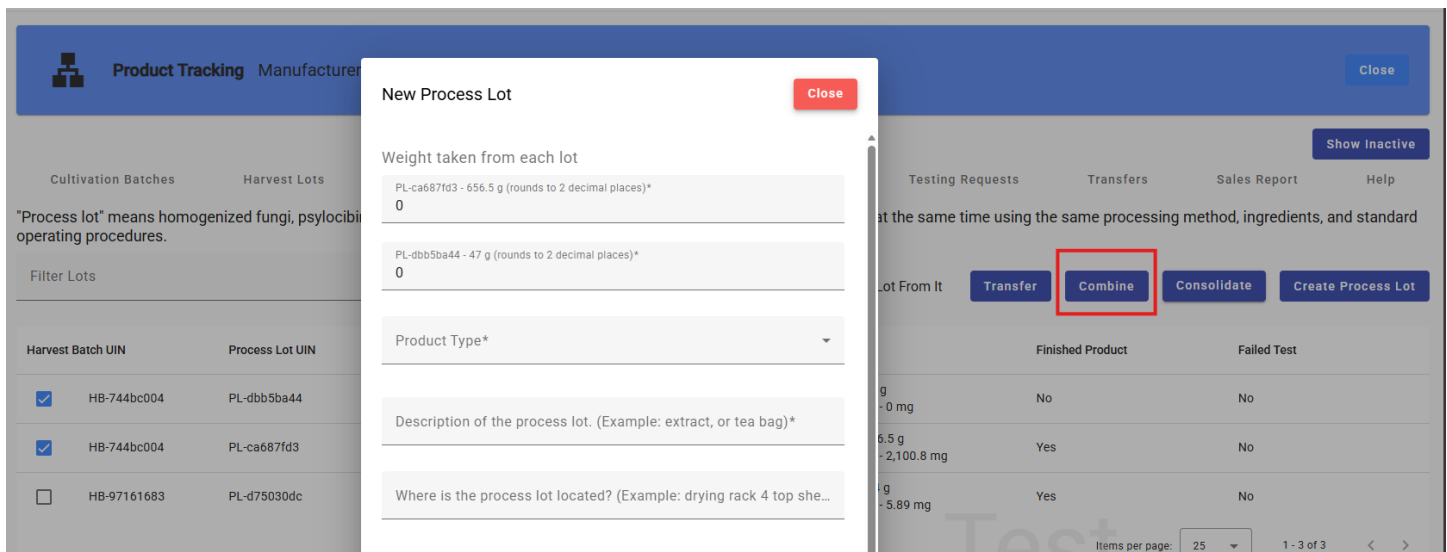

This feature is released on Fri, 9/25/26 by 10 AM. To see this change, please close your browser, open a new browser, and log back into TLC:

<https://psilocybin.oregon.gov/welcome>.

'Combine' Process Lots is fixed:

The issue that was preventing process lots from being combined is now fixed. The "Combine" button is working correctly.

You can stop using any workarounds for combining process lots. Just combine the process lots the normal way now.

The screenshot displays the TLC-PTS (Product Tracking System) interface. A modal window titled "New Process Lot" is open, showing fields for "Weight taken from each lot" (with two entries: "PL-ca687fd3 - 656.5 g (rounds to 2 decimal places)*" and "PL-dbb5ba44 - 47 g (rounds to 2 decimal places)*"), "Product Type*", "Description of the process lot. (Example: extract, or tea bag)*", and "Where is the process lot located? (Example: drying rack 4 top she...)". The "Combine" button is highlighted with a red box. In the background, a table lists process lots with columns for "Harvest Batch UIN", "Process Lot UIN", and "Status". The table includes rows for "HB-744bc004" (PL-dbb5ba44, PL-ca687fd3) and "HB-97161683" (PL-d75030dc). The "Combine" button is also visible in the background interface.

Please contact 'Product Tracking Team' through TLC messages if you have any questions or concerns.

Thank you!
