

## Cross Agency Health Improvement Project

The Cross Agency Health Improvement Project (CAHIP) aims to improve the health of employees, clients and consumers of the Oregon Health Authority (OHA) and Department of Human Services (DHS). As a steering committee, CAHIP members work across agencies to achieve the common goal of implementing culturally and linguistically appropriate policies to encourage worksite wellness, tobacco-free living, and improving nutrition and physical activity among OHA/DHS employees, clients and consumers.

Activities in the 2013-2015 CAHIP Workplan range from relationship building among local SNAP ED and tobacco prevention coordinators to piloting a employee wellness policy at OHA/DHS HR & Shared Services offices.

The CAHIP steering committee meets quarterly to report progress related to workplan activities; provide input on possible wellness-related policies to be considered by the OHA/DHS Joint Operations Steering Committee; and support implementation of wellness initiatives impacting the health of OHA/DHS employees.

CAHIP Steering committee members include:

- DHS Aging & People with Disabilities
- DHS Child Welfare
- DHS Developmental Disabilities
- DHS Office of Licensing and Regulatory Oversight
- DHS Self Sufficiency
- DHS Vocational Rehabilitation Services
- OHA Addictions and Mental Health
- OHA Medical Assistance Programs
- OHA Office of Equity and Inclusion
- OHA Office of Health Policy and Research
- OHA Oregon State Hospital
- OHA Public Health Division
- OHA/DHS HR & Shared Services
- Public Employees Benefit Board/Oregon Educators Benefit Board
- Service Employees International Union
