

**Addendum Dental Pilot Project Modification:
Dental Pilot Project #200
“Training Dental Hygienists to Place Interim Therapeutic Restorations”**

DPP#200 has targeted utilization sites with a high percentage of individuals who are from populations identified as evidence-based groups of individuals with the highest disease rates and the least access to dental care.

Since the inception of the pilot project, combined billing data for all DPP#200 sites are as follows:

Medicaid (Oregon Health Plan)	81.0 %
Uninsured	9.5 %
Privately Insured	9.5 %

It is the goal of DPP#200 to continue to see as many of the individuals identified from the targeted populations groups as possible.

- Currently, 75% of the locations served by DPP#200 are defined by HRSA as rural.
- 69% of proposed additional locations are defined as rural by HRSA.
- If all proposed utilization locations are approved, 71% of the locations served by DPP#200 will be rural as defined by HRSA.

The modification would expand the targeted populations served by DPP #200 to the following populations which are evidenced based populations that have shown higher disease rates and least access to dental care.

Targeted Population Descriptions DPP#200	
WIC¹	<p>Woman, Infant, Children (WIC) serves lower-income pregnant, postpartum and breastfeeding women, infants and children under age 5 who have health or nutrition risks. Many working families are part of WIC - 71% of Oregon WIC families are employed.</p> <p>Applicants must meet four criteria to be eligible for WIC:</p> <ul style="list-style-type: none"> • Live in Oregon. • Be a pregnant, postpartum or breastfeeding woman, an infant or a child under 5 years old. • Have a household income less than 185% of the federal poverty limit. <i>(Individuals who can prove Fully eligible for Medicaid/Oregon Health Plan, TANF, SNAP/Food Stamps or FDPIR are automatically income eligible for WIC.)</i> • Have a nutritional need or risk.

¹ <https://www.oregon.gov/oha/PH/HEALTHYPEOPLEFAMILIES/WIC/Pages/index.aspx>

<p>Older-Adults</p>	<p>Oregon has been at the forefront of healthcare transformation efforts in the nation, but has been slower to transform the provision of oral health care to older adults.^{2,3} As Oregon’s population ages, senior Baby Boomers need for dental care will continue. However, for many, the ability to pay for services will be at risk as a result of decreased income. Through Dental Pilot Project #200, we will provide on-site dental services for older adults in nursing homes as a strategy to expand access to dental services.</p> <ul style="list-style-type: none"> • 43% of Oregon’s older adults live in rural communities. • 1 in 3 older-adults in Oregon had no dental visits in 2015. • 84% of older-adults in Oregon, on Medicaid with diabetes had no dental visits last year.⁴
<p>National School Lunch Program (NSLP)</p> <p><i>Formerly known as the FRL (Free-Reduced Lunch Program)</i></p>	<p>Expand to additional schools located in Sherman/Gilliam Counties:</p> <p>The National School Lunch Program is a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions. It provides nutritionally balanced, low-cost or free lunches to children each school day.⁵</p> <p>Income Eligibility Guidelines are based on the Federal Poverty Guidelines⁶ (FPL) and used in determining eligibility for free and reduced-price meals and free milk.</p> <ul style="list-style-type: none"> • Children whose household income is less than 130% of FPL qualify for free lunch. • Children whose household income is between than 130% and 185% of FPL qualify for reduced-prince lunch. <p>The percentage of students eligible for free or reduced-price lunch (FRPL) under the National School Lunch Program provides a proxy measure for the concentration of low-income students within a school.¹ In this indicator, public schools² (including both traditional and charter) are divided into categories by FRP eligibility.</p> <ul style="list-style-type: none"> • High-poverty schools are defined as public schools where more than 75.0 percent of the students are eligible for FRPL. • Mid-high poverty schools as those where 50.1 to 75.0 percent of the students are eligible for FRPL.

⁶ <https://aspe.hhs.gov/poverty-guidelines> Federal Poverty Guidelines

	<ul style="list-style-type: none"> • Mid-low poverty schools as those where 25.1 to 50.0 percent of the students are eligible for FRPL. <p>In school year 2015–16, some 20 percent of public-school students attended low-poverty schools, and 24 percent of public school students attended high-poverty schools.⁷</p> <p>FRL is used as a proxy for income as poverty rates for individuals are typically not available.</p>
Oregon Health Plan (Medicaid)	<p>Oregon Health Plan⁸ (OHP) is the name for the Medicaid program in Oregon. Medicaid offers comprehensive medical, dental and behavioral health to participants. Participants must meet eligibility requirements including income eligibility requirements.</p> <ul style="list-style-type: none"> • Adults - OHP is available to adults who earn up to 138 percent of the Federal Poverty Level • Children - OHP is available to kids and teens (0-18) whose family earns up to 300 percent of the Federal Poverty Level
Coordinated Care Organizations (CCO)	<p>"A coordinated care organization is a network of all types of health care providers (physical health care, addictions and mental health care and dental care providers) who work together in their local communities to serve people who receive health care coverage under the Oregon Health Plan (Medicaid). CCOs focus on prevention and helping people manage chronic conditions, like diabetes. This helps reduce unnecessary emergency room visits and gives people support to be healthy."⁹</p> <ul style="list-style-type: none"> • See details under Oregon Health Plan (Medicaid) above.
Rural	<p>Rural¹⁰ is defined by the federal government. They use two major definitions of "rural," along with many variants that are also available. One is produced by the U.S. Census Bureau and the other by the Office of Management and Budget. The Federal Office of Rural Health Policy uses components of each definition when determining a classification for a geographic region.</p> <ul style="list-style-type: none"> • Populations residing in rural areas may be underserved¹¹ • A HPSA designation describing the specific populations underserved is available. • See Oregon Areas of Unmet Health Care Need Report.¹²

	Extensive details on the definition can be found at https://www.hrsa.gov/rural-health/about-us/definition/index.html
Primary-Medical Home Clinics/ Behavioral Health Clinics/ Women’s Health Care	<ul style="list-style-type: none"> • Medical clinics with significant Medicaid patient population. • Behavioral health clinics with significant Medicaid patient population • Medical clinics with significant populations that are evidence-based populations with the highest disease rates and least access to care. <ul style="list-style-type: none"> - Pregnant Women (Medicaid recipients, low-income, rural) - Diabetic - Children (low-income/Medicaid/rural) • Several of the utilization sites/clinics are located in rural areas and have rural designations as identified by HRSA • Oral-Health integration into primary care practice^{13, 14, 15, 16}

Continued services will be provided at the Head Start locations in Salem and Independence, Oregon.

Head Start¹⁷	<p>Head Start programs promote school readiness of children ages birth to five from low-income families by supporting the development of the whole child.</p> <p>Head Start programs support children’s growth and development in a positive learning environment through a variety of services, which include</p> <ul style="list-style-type: none"> • Early learning: Children’s readiness for school and beyond is fostered through individualized learning experiences. Through relationships with adults, play, and planned and spontaneous instruction, children grow in many aspects of development. Children progress in social skills and emotional well-being, along with language and literacy learning, and concept development • Health: Each child’s perceptual, motor, and physical development is supported to permit them to fully explore and function in their environment. All children receive health and development screenings, nutritious meals, oral health and mental health support. Programs connect families with medical, dental, and mental health services to ensure that children are receiving the services they need. • Family well-being: Parents and families are supported in achieving their own goals, such as housing stability, continued education, and financial security. Programs support and strengthen parent-child relationships and engage families around children’s learning and development. <p>Income requirements for participation in head start¹⁸</p>

Scoring Methodology:

II. Dental Health HPSA Scoring

We calculate a score between 0-26 for Dental Health HPSAs. The following figure provides a broad overview of the four components used in Dental HPSA scoring:

21

Once designated, HRSA scores HPSAs on a scale of 0-25 for primary care and mental health, and 0-26 for dental health, with higher scores indicating greater need.

Dental HPSA's are not considered a population.

These designations target millions of dollars of federal resources to improve health care in underserved areas of the state. [OHA Office of Primary Care] estimates these designations bring in over \$20 million per year in unmatched federal resources.

Not all individuals living in Dental HPSA's are considered underserved. See descriptions of shortage designations.
